THE MIDNIGHT SUN A. Smith

W. F. Miles

THE JOURNEY

"As the voyage drew to a close & we approached the upper end of the gulf of Botomai the twilight had disappeared, & between the setting & rising of the sun hardly one hour (had) elapsed."

Hesperanda is in  $65^{\circ} 51'$  N. Lat & 41 miles S. of the Arctic circle. It is  $1^{\circ} 18'$  further N than Archangel etc.

The sun rose on 21<sup>st</sup> June at 12.01 A.M. & sets 11.57 P.M. From the 22<sup>nd</sup> to 25<sup>th</sup> of June the traveller may enjoy the sight of the midnight sun from Anorocua, a hill 600 ft high & about 45 miles distant on the other side of the stream & should he be a few days later by driving North on the high Rd he may still have the opportunity of seeing it."

The intrepid explorer then describes his journey over land from Hesperanda to the Arctic Ocean, the distance being over  $5^{\circ}$  of Lat. to the most N. extremity of the land. It is inhabited by fawns & lapps, climate is delightful etc.

STRANGE NIGHTS

Speaking of the station called Payala M. Chullow says

"From the hills on the other side of the stream at this place one may enjoy the sight of the midnight sun a few days later. How strange are those evening & morning twilights which merge insensibly into each other, to travel in a country where there is no night, & no stars to be seen, where the moon gives no light and, going further N. where the sun shines continuously day after day! The stranger at first does not know when to go to bed & when to rise but the people know the hours of rest by their watches & by looking at the sun."

At Anorocua he was told they had snow on the ground as late as 2nd June after a winter during which the thermometer had fallen to  $40^{\circ}$  &  $45^{\circ}$  below zero, yet at the time of his visit he saw garden peas about 2 inches above the ground which would be got forward in Sept. In these latitudes the snow has hardly melted when the mosquitoes appear in countless multitudes the people have no res. day a.

"Between the stations of Kusojarvi & Ruokogamon we crossed the Arctic circle at  $66^{\circ} 32'$  N or 1,408 geographical mls (?) south from the pole, where the sun shone for an entire day on the 22nd of June & the observer will see it above the horizon at midnight, and does not. After that date by journeying north on an average of about 10 mls per day he would continue to see the midnight sun till he reached the pole. On 22nd Sept the sun descends to the horizon, where it will rest, so to speak, all day long, on the following day it disappears to the 22nd of March."

"When returning southwards at the same rate the traveller will continue to see the midnight sun in his horizon till he reaches the Arctic circle where for one day only, as we have seen, the sun is visible."

#### THE SUN'S MOTION

Further quoting from these interesting travels

"The sun at midnight is always N. of the observer on account of the position of the earth (?) IT SEEMS TO TRAVEL AROUND IN A CIRCLE, requiring 24 hrs. for its completion, it being noon when it reaches the greatest elevation & midnight at the lowest. Its ascent & descent are so imperceptible at the pole, & the variations so slight, that it sinks south very slowly & its disappearance below the horizon is almost immediately followed by its reappearance." After giving the modern astron. "explanation" of these northern phenomena an explanation founded on  $\frac{1}{2}$  a day improved & unprovable assumptions. He proceeds. "The nearer any point is to the pole the longer, during this time (from the summer to Autumnal equinox)" is its day. The number of days therefore, of constant sunshine depends on the latitude of the observer & the further N. he finds himself the greater will be this number. Thus at the pole (The N. circle)?"

The sun is seen for 6 mos. at the arctic circle for  
 1 whole day & at the base of the N. Cape for  
 the 15th of May to 1st of August. At the pole  
the observer seems to be in the centre of a grand  
spirals movement of the sun, which, further South  
 takes place N. of him. (undisturbed ones)

Thus we see that in spite of educational  
 bias & human belief the truth will unconsciously &  
 innocently creep up on any description which is true  
 to the facts of nature. But before we criticize the  
 phenomena further we prefer to give all the facts  
 which the interesting writer of the LOW OF THE ICE etc has  
 so carefully gleaned for us. He goes on to describe

#### HOW THE SUN IS SEEN

"We have here spoken as if the observer were on a  
 level with the horizon, but should he climb a  
 mountain of course the sun will appear higher  
 & should he instead of travelling 15 miles N.  
 climb about 220 ft above the sea level (!)

each day he would see it the same as if he had  
 gone N.; consequently if he stood at the Arctic  
 circle at an elevation, & had an unobstructed view  
 of the horizon, he would see the sun one day sooner  
 hence tourists from Hakaranda prefer going to  
 Arusaasa 680 ft above the sea, from which  
 though 8 or 10 miles south of the arctic circle they  
 can see the midnight sun for 3 days."

"There are days when the sun has a pale whitish  
 appearance, & when even it can be looked out for  
 6 or 7 hrs. before midnight. As this hr. approaches  
 the sun becomes less glowing, gradually changing  
 into more brilliant shades not deep towards the  
 lowest point of its course. Its motion is very  
 slow & for quite a while it apparently follows  
 the line of the horizon, during which there seems  
 to be a pause, as when the sun reaches noon.  
 This is <sup>at</sup> midnight: for a few minutes the glow  
 of the sun ~~is~~ merges with that of sunrise

of one cannot tell which prevails, but soon the light becomes slowly & gradually more brilliant announcing the birth of another day - & after before we have elapsed the sun becomes so dazzling that one cannot look at it with the naked eye."

Again ascending the R. Muonio <sup>on 30th</sup> Chudler on June 2.  
 "I came to Kiekas where the first boat station situated on a hill commanding a fine view of the country & overlooking the R. Muonio. The people were all asleep as it was midnight; The sun had become paler & paler, its golden shedding a drowsy quiet light all over the landscape & a heavy blue was falling; the house swallows had gone to their nest, the cuckoo was silent & the sparrows could not be heard." How beautiful was the half midnight! How red & gorgeous was the sun! How drowsy was the landscape. Nature seemed as if in the midst of summer. Crystal dewdrops glistened like precious stones as they hung from

the blades of grass, the petals of wild flowers & the leaves of the birch trees. Before 2 o'clock the birds were out of their nests which they had constructed on the different buildings of the farm. How far they had come to enjoy the spring of this new region. I did not wonder they had loved the beautiful & short summer as that they came year after year to the land of the midnight sun.

#### CIVILIZATION NORTH

From lat 70° back were so numerous villages scattered farms with church, school & recreation.

He had a game of tag & sword

"At 11 p.m. the sun shining brightly they bade me good night & went to their homes leaving me in admiration at their simplicity, innocence & gentle manners.

#### A FAREWELL VIEW

The final view from the Isle of Nagroec at the

N. Cape on the 20th of July he proceeds  
 " After a walk of several miles I stood  
 upon the extreme point of N. Cape in Lat.  $70^{\circ} 10'$   
 980 ft above sea level. Before me as far as  
 the eye could reach was the deep blue arctic  
 ocean, disappearing in the northern horizon.  
 Whichever I gazed I beheld nature bleak, dreary,  
 desolate; grand indeed, but sad. A sad repose  
 rested upon the desolate landscape which has  
 left an indelible impression upon my memory."

" Lower & lower the sun sank, & as the hour  
 of midnight approached it seemed for a while  
 to follow slowly the line of the horizon  
 & at that he it shone beautifully over the  
 lovely sea & dreary land. As it disappeared  
 behind the clouds, I exclaimed from the  
 very brink of the precipice, Farewell to the  
<sup>capitane</sup> midnight sun."

" I had now seen the mountain tops & would

plateaus, shining over a barren & sterile & snow  
 clad country I had watched it - when ascending  
 or descending <sup>the</sup> ~~great~~ <sup>high</sup> ~~glaciated~~ river, or crossing lonely  
 lakes; I had beheld many a landscape,  
 luxuriant fields, verdant meadows, grand old  
 forests dyed by the dawning light. I followed it  
 from the gulf of Bothnia to the polar sea in a way  
 would chase a well <sup>the</sup> ~~o' war~~ I could go no further.

" I retraced my steps to where we had left our little boat.  
 The men were watching for us; it had begun to rain  
 & when we had got back to Gjoasvæ I was wet &  
 chilly & my feet were like ice; I was exhausted  
 for I had passed 24 or 20 hrs without sleep  
 but to this day I have before me those dark  
 rugged cliffs, that dreary silent landscape,  
 that restless A. Ocean, & that serene midnight  
 Sun shining over all, & I still hear the  
 sad murmur of the waves beating upon the  
 lovely N. Cape."

## PROOF THAT EARTH IS NOT A GLOBE

Having given the facts connected with this interesting enquiry, we now proceed to show how those facts utterly conflict with the globular theory & how beautifully they harmonize with the plain earth truth.

Let A. C. B. D represent the globe rotating upon its axis A.B. The line C.D. will represent the circle of the equator midway between the poles A.B.

The line F.G. will show position of T of Cancer said to be  $23\frac{1}{2}^{\circ}$  N. of equator which is the highest north declination the sun attains on or about June 24<sup>th</sup>.

Let P represent the position of the sun directly vertical over this tropical line at this period.

In this position it would be mid-day on the side of the earth next to the sun along the meridian

H.F.N, & it would be midnight on the opposite side along the meridian M.D.O.

Let H.M. represent the A. circle said to be  $23\frac{1}{2}^{\circ}$  from the N.P. at A or about  $66\frac{1}{2}^{\circ}$  of N. Lat, which latitude a circle runs across the N. parts of Norway & Sweden.

Now we are credibly informed by travellers that in the latitude of or about the above mentioned date a spectator at M. can see the sun at midnight above the horizon looking directly across the north pole in the direction M.G. The horizon is a straight line tangential to the surface of the sphere at the point of observation & it must therefore be placed at right angles to the dotted line E.M. running from the centre of the sphere to the latitude & position of the observer.

But we have already alluded to the fact that the sun is never seen directly over any part of the earth N. of the T of C. that is the sun is never more than  $23\frac{1}{2}^{\circ}$  N. of the equator. Persons living further N. than this have always to look in a S. direction for the sun at noon & it ought never to be seen to the N. of them at any time so we must place the sun in the diagram somewhere on the line P.F.G. let it be placed at any point P.

Now it is manifest for the observer at M, near the lat of Haparanda to see the sun at midnight at P, over the Joff Canal he would have to look downwards & be able to see right through the "globe" for 5 or 6000 miles along the dotted line MR!! I am not aware of any traveller that claims this ability, nor yet that the globe to oblige astronomers becomes transparent at this period. I am not aware that any spectator of the phenomenon of the midnight sun has to look down upon this gorgeous spectacle. The traveller sees it above his horizon & the higher he ascends the higher the sun is seen. . . . the earth cannot be a globe; & thus the midnight sun is a splendid & periodic witness to the fallacy of this absurd unscientific & infidel hypothesis.

#### FURTHER ASSUMPTIONS

If the spectator could look right through the earth & see the sun ought to be found on the line SFP instead of that it is many thousands of miles & of where it ought to be. I fear that the sun has not yet been converted to the Newtonian way of thinking or acting. Its conduct is rather unconvincing with modern recent belief & it is very well known that the behaviour of the moon is still more outrageous.

considered from an astronomical point of view.

There may be some little excuse for the moon in her wayward wanderings considering her changeable character & the use generally applied to her; but surely the sun ought to keep his place better with respect to the globe than to go at night starting travellers nearly at the N. pole. But perhaps if they could only see it he is starting with a tombstone at some of their unphilosophical ideas; & if their recent consciences be not utterly seared he must strike them out of all countenance with such ideas.

There must be something sadly wrong somewhere for both luminaries regularly to show their smiling faces in positions both when & where they never ought to be seen. How is it? Perhaps gravitation gets a bit slack at times & kindly allows them these little excursions. We planets have no need to complain although it rather frets the Astronomers.

### THE PLANE TRUTH

Let ABCD represent the meridian with N at the centre. The thicker circle EFGH will rep. the equator or sun's daily run at March & Sept equinoxes & ABCD the S ice barrier, JKLM Capricorn, STVW. Arctic circle & outer one Antarctic.

## SPIRAL PATH

when the sun is on the equator it is acknowledged its light extends to the N. centre. G N returns: the distance the sun's rays can pierce through our atmosphere in a N or S direction so as to show the full body of the sun to an observer N or S. Hence when it is over the T of Cap. at L its direct rays cannot be seen beyond the Arctic Circle hence they are in darkness as far as its direct rays are concerned L V being equal in distance to G N.

1  
100 PROOFS THAT EARTH IS  
NOT A GLOBE W. Carpenter

INTRODUCTION

The truth will always find advocates — men who care not a snap of their fingers for the mere opinion of the world whatever form it may take whilst they know that they are masters of the situation & that reason is being. The reader is requested to be patient & not expect a whole flood of light to burst upon him at once, through the dense clouds of opposition & prejudice which hang all around.

If a man uses the reason which God has given him, he gains knowledge; if he uses them not, he remains ignorant. Mr R. A. Proctor called the greatest astronomer of the age says, "The earth on which we live & move seems to be flat." He does not mean that it seems to be flat to the man who shuts his eyes on the face of nature or who is not in full possession of his senses. But to the average common sense wide-awake thinking man.

2  
" he continues  
"There seems nothing to prevent us from travelling as far as we please in any direction towards the ends all round us called the horizon where the sky seems to meet the level of the earth." he tells us to guard the beginner against the captious objections which have from time to time been urged against accepted astronomical theories. "Then the things which are to be defended are those accepted astronomical theories it is not truth which is to be defended against the assaults of error it is simply theories whether right or wrong simply because they have been accepted. because it was not thought worth while to look at them. Sir John Herschel says, "We shall take for granted from the outset the Copernican system of the world." He did not care whether it was the right system or the wrong one or he would not have done that he would have looked into it.

The way in which the experiment is carried out is to all intents & purposes the way Mr "P" states it can be tried. He shows how the roundness can be proved by means of 3 boats on a large sheet of water. But although the accepted astronomical theories be scattered to the wind we charge Mr Procla either that he did not make the experiment with the 3 boats, or that if he has the experiment did not prove what he says it will. Are accepted theories to be bolstered up with absurdity & falsehood. Why if it were possible to show the two ends of a 4 mile stretch of water to be on a level, with the centre portion bulged up, the surface of the earth would be a series of 4 mile curves. Mr "P" says we can set 3 boats in a line on the water as on A.B.C. & equal marks are placed in them & we place a telescope as shown & when we look through it we see the tops of the marks A & C but we find

that B is above the eye line. Now Mr "P" either knows or ought to know that we see nothing of the sort. If he has ever tried the experiment he knows that the 3 marks will range in a straight line just as common sense tells us they will. If he has not tried the experiment he should have tried it, or have paid attention to the details of experiment of those <sup>who</sup> have tried similar experiments scores of times & again. Mr "P" may take either horn of the dilemma he pleases he is just as wrong as a man can be either way. He mentions no names but says a person has tried such an experiment as the above & had found that the surface of the water was not curved. "Another person seems to have believed the first & become so certain that the earth is flat as to wager a large sum of money that if 3 boats were placed as in fig 4 the middle one would not be above the line joining the two others &

unfortunately for him someone who had more sense agreed to take his wages & of course wore his money." Here we see that Mr Proctor knows better than to say that the experiments conducted by Parallax were things of the imagination only; or that a wrong age had been given off them & it would be well if he knew better than to try to make his readers believe that either one or the other of these things is the fact. Who then are the foolish people who believe; those who believe the record made of experiments made by researchers after Truth or those who shut their eyes to them; throw a doubt upon the record, charge the conductors of the experiments with dishonesty, never conduct similar experiments themselves & declare the results of such experiments to be not so; when the declaration can be proved to be false by any man, with a telescope on 24 hrs. Well Mr Proctor we tell you to

Take back your words & remodel them on the basis of truth such careless misrepresentations of facts are a disgrace to science Mr B Lakin in his work on Self Culture says "all flimsy, shallow, & superficial work, in fact, is a lie, of which a man ought to be ashamed". There is an extended plain from the centre over which hangs <sup>to ever</sup> the pole star a fact which all the falsehoods that can be brought to bear upon it with their dead weight will never overthrow it is God's truth the face of which however man has the power to smother with his unclean hands. Mr P says "we learn from astronomy that all these ideas, natural though they seem are mistaken." Means natural ideas & conclusions & experimental results are then to be overthrown by what? astronomy a thing without a soul or mere theoretical abstraction The outcome of the dreamer Mr P who can so much as attempt to manage his flat head & large the business

It does not matter that we find it so put down in that  
 conglomeration of suppositions which you seek to defend.  
 What is the evidence of it? where can it be obtained? It  
 seems to be flat when is the mistake? If the earth  
 seems to be what it is not how can we trust our  
 senses if it is said that we cannot are we to consent  
 to be put down lower than the Brutes.

We have before us the duty of denouncing the absurd  
 dogma as worse than an absurdity a fraud.

We charge you that whilst you teach its rotundity & mobility  
 you know that it is a plane & here is the ground of the  
 charge. You picture the surface in exact accordance  
 with your verbal description & from your diary we learn  
 we it is the level of a mechanic & not the level of the  
 astronomer. Now for evidence of this grand fact which  
 other people may know as well as you remembering from  
 Long to last that you have not dared to bring  
 forward a single item from the mass of evidence which  
 is to be found in 2. Philosophy by Parvulus.

the influence of which it was the avowed object of  
 your book to crush.

1. The aeronaut can see for himself that the earth is  
 a plane. The appearance presented to him even at  
 the highest elevation he has ever attained is that of  
 a concave surface this being just what is to be  
 expected of a surface which is truly level since it is the  
 nature of level surfaces to appear to rise to  
 the level of the eye of the observer. This is  
 an actual demonstration & proof that the earth  
 is not a globe.

2. Whichever experiments have been tried on level  
 water the surface has always been found to  
 be level. If the earth were a globe the  
 surface of all standing water would be convex.  
 This is an experimental proof that the  
 earth is not a globe.

3. Every operation in the construction of  
 railroads tunnels or canals are conducted

9  
without the slightest allowance for the curvature of the earth. This is a cutting proof that the earth is not a globe.

4 Rivers flowing 1000's of miles to level of the sea without falling more than a few ft. A level exposure of this extent is quite incompatible with the idea of the earth's convexity it is a reasonable proof that the earth is not a globe.

5 Lighthouse lights are visible by navigators at distances which according to the scale of curvature given by astronomy are in many cases 100's of ft below the line of sight. Cape Hatteras 6000 ft below the line of sight. (See "The Earth is Not a Globe" by John H. Peltola) notwithstanding through it is to be under the necessity of proving at all it is nevertheless conclusive proof that the earth is not a globe.

6 If we stand on the sea shore & watch an approaching ship she will gradually rise to the extent of her own height &

no more. If we stand on an eminence the same land appears still at the end of perspective. There is no other rise than that which is from the plain feet that no matter how high we ascend the horizon on it is still on an even surface so that it is always on a level with the eye though it be 200 miles distant. So that a ship 5 miles away may be imagined to be coming up the imaginary downward curve of the earth's surface but if we ascend a hill we may see 20 miles away on a level with the eye & 20 miles beyond the ship which we vainly imagined rounding the curve of the earth. This is a plain proof that the earth is not a globe.

7 A ship built down full of water. Since the idea will not stand ground when facts rise up against it & it is a piece of popular theory & contemptible. We may easily wrong from it a proof that the earth is not a globe.

- 8) If the earth were a globe a small model globe would be the very best because the least of a ~~man~~ is to take to sea with him. But as such a thing is not to be used with such a toy as a guide. This is a proof that the earth is not a globe.
- 9) As they take to sea with their charts constructed as though the sea were a level surface, however their charts may err as to the true form of this level surface as they find them answer their purpose tolerably well for many miles are wrecked owing to the error. Thus we draw from the common sense system of plane sailing a practical proof that the earth is not a globe.
- 10) That the mariners compass points N & S at the same time is a fact as indisputable that 2 + 2 makes 4 & if it were placed on a globe with the N & S at the centre of opposite sides it would be impossible & it requires no

- long the train of reasoning to bring out of it a pointed proof that the earth is not a globe.
- 11) Compass pointing N & S at same time though it is attracted to the N. power there is no SP.
- 12) There is no SP but an infinity of points forming together a vast circumference E & W are directions at right angles with N & S line & S point shifts round to all parts of the boundary. A W circum is going round with N Star on right hand & an E circum. when the reverse condition of things is maintained these facts form a beautiful proof that the earth is not a globe.
- 13) Meridian is only a straight line a controvertible proof etc.
- 14) Extension of degrees other side of equator important practical proof etc.
- 15) Instead of sailing horizontally round the earth ships are taken down the one

side of the globe & brought up the other side in  
except as a mere dream impossible & absurd &  
since there are neither compass nor also in navigation  
it stands without argument etc.

16 If a globe the distance round  $45^\circ$  would  
be the same as the same it is found by measurement  
to be twice the distance it is proof etc.

17 Human beings require a surface on which  
to live that in its general character is level  
& since the omniscient Creator must determine  
the way for his creatures 1 2 3 4  
All were created in 1 2 3 4 5 6 7 8 9 10  
Theological & etc.

18 The best provision for a man are his senses & if  
he uses them all he will not be deceived in his  
survey of nature. It is only when some  
faculty or other is neglected or abused that  
he is deluded. Every man in full command  
of his senses knows that a level surface is

a flat or horizontal one but astronomical tells us  
that the true 1 2 3 4 5 6 7 8 9 10  
11 12 13 14 15 16 17 18 19 20  
so they give  
him one in name which is not one in fact.

Since this is the 1 2 3 4 5 6 7 8 9 10  
11 12 13 14 15 16 17 18 19 20  
I follow creatures deceive them  
it is clear that things are not as they say they  
are if in short a proof etc.

19 not suicidal & unreasonable mode of  
endeavouring to show it. proof no good.

20 Common if nothing else in nature tells a  
man that there is up & down in nature in  
regard to Earth 1 2 3 4 5 6 7 8 9 10  
11 12 13 14 15 16 17 18 19 20  
in imitation to a common sense proof etc.

21 Human experience tells him that he is not  
constrained like flies to move about on  
the ceiling of a room or with as much safety  
as the floor & since the theory of a planetary

earth & ... one is that men are bound to the earth with a force that fastens them to it like needles round a spherical ... condition a theory perfectly outrageous & opposed to all human experience it follows that unless we can trample upon common sense & ignore the teachings of experience we have evident proof

22) Gods truth never requires a falsehood to help it along ... men have been able to go round the earth in several directions since there are only 2 ways to ... presumptive evidence that there came in a ... proof that the earth etc.

23) If astronomical works be searched through & through, there will not be found a single instance of a bold, unhesitating or manly statement respecting a proof of the earths

sturdily "Proctor speaks of proofs which serve to show that the earth is not flat & says that many find reason to say that the earth is not flat & speaks of certain matters being explained by supposing the earth is a globe" & says that "people have assured themselves that the earth is a globe" but he says also that "there is a most complete proof that the earth is a globe just as though any thing in the world could possibly be wanted but a proof - a proof that proves & settles the whole question this however all the money in the U.S treasury would not buy; and, unless all the astronomers were so rich that they don't want the cash it is a sterling proof that the earth is not a globe.

24) When a man speaks of a most complete thing among several other things that claim to be what that thing is it is evident that they must fall short of something which the most complete

thing possesses. And when it is known that the most complete thing is an entire failure it is plain that the others all & sundry are worthless.

"Proctor must complete proof that the earth is a globe. Lies in 'the fact' that distances from place to place agree with calculation. But since the distance round the equator south of the equator  $45^{\circ}$  is twice the distance it would be on a globe it proves that what the greatest astronomer of the age calls a fact & that his most complete proof is a complete failure & he might have told us out once that he has no proof to give us at all. Now since if the earth be a globe there would necessarily be piles of proofs of it all around us, it follows that when astronomers with all their ingenuity, are utterly unable to point one out or to say nothing about pulling one up, that they give us proof that the earth is not a globe.

- 25 The surveyors plans in relation to the laying of the first St. J. Cable show that in 1665 from Valentia in Ireland to St. Johns Newfoundland the surface of the St. O. is a level surface not the astronomer level either the authoritative drawings, published at the time, are standing evidence of the fact & form a practical proof etc.
- 26 If the earth were a globe it would if we take Valencia to be the place of departure, curve downwards in the 1665 miles across the Atlantic to New Foundland, according to the astronomer own tables more than 300 miles but the surface of the Atlantic does not do so. The fact of its levelness having been clearly demonstrated by Telegraph Cable Surveyors it follows that we have a grand proof that etc.
- 27 Astronomers in their supposed consideration of the curvature of the earth have carefully avoided the taking of that view of the question

which if anything were needed to do so would show its utter absurdity. It is this: - If instead of taking our ideal departure to be at Valencia, we consider ourselves at St Johns the 1665 mls of water between us might just as well curvate downwards as it did in the other case. Now since the direction in which the earth is said to curvate is interchangeable depending indeed, upon the position of a man upon its surface - The thing is utterly absurd. It follows that the theory is an outrage & that the earth does not curvate at all an evident proof etc.

28 Astronomers are in the habit of considering two points on the earth's surface, without, it seems, any limit as to the distance that lies in between them as being on a level & the intervening section even though it be an ocean or a vast hill of water. The At Oc. in taking this view of the matter would form a hill of water more than 100 mls high. The idea is simply monstrous, & could

only be entertained by scientists whose whole business is made up of materials of the same description. It certainly requires no argument to deduce from such science as this a satisfactory proof etc.

29 If the earth were a globe it would, unquestionably have the same general characteristics no matter its size as a small globe as can be stood upon a table. As the small globe has top, bottom & sides so must also the large one - no matter how large it be. But as the earth which is supposed to be a large globe has no sides or bottom as the small globe has, the conclusion is irreversibly that it is a proof etc.

30 If the earth were a globe the observer who should ascend above its surface would have to look downwards at the horizon (fig 18. & 19. & 20) even an art. diagram indicates at angles varying from  $10^{\circ}$  to  $50^{\circ}$  below the horizontal line of sight (it is just as absurd as it would be to be taught that when we look a man full in the face we were looking

down at his feet) But as no observer in the clouds or upon any eminence upon the earth has ever had to do so it follows that the deys. & fables of are imaginary & false that the theory which requires such things to prop it up is equally airy & untrue & that we have a ~~debt~~.

31) If the earth were a globe it would certainly have to be as large as it is said to be 25,000 mls in circumference. Now the thing which is called a proof of the earth's roundness, & which is presented to children at school, is, that if we stand on the sea-shore we may see ships as they approach us absolutely coming up & that as we are able to see the highest parts of these ships first it is because the lower parts are behind the earth's curve. Now if this were the case the size of the earth indicated by such a curve as this would be so small that it would only be big enough to hold the people of a parish, if they could get all round it, instead of the nations of the

would it follows that the idea is preposterous & that the appearance is due to another & reasonable cause & instead of being a proof of the globular form of the earth is a proof etc.

32) It is often said that if the earth were flat we could see all over it! This is the result of ignorance. If we stand on the level surface of a plain or prairie, & take notice, we shall find that the horizon is formed at about 3 mls all around us. That is, the ground appears to rise up until, at <sup>that</sup> distance, it seems on a level with the eye or line of sight. Consequently objects no higher than we stand — say, 6 ft — and which are at that distance (3 mls) ~~are~~ have reached the "vanishing point," & are beyond the sphere of our unaided vision. This is the reason why the hull of a ship disappears in going away from us before <sup>the masts</sup> & instead of there being about it the <sup>shadows of</sup> ~~unaided~~ evidence of the Earth's roundness it is etc.

32 If the earth were a globe, people except those on top would certainly have to be fastened to its surface by some means or other whether by attraction of atoms or some other under covered or under coverable process! But as we know that we walk on its surface without any other aid than that which is necessary for locomotion on a plane it follows that we have herein a conclusive proof etc.

35 If the earth were a globe there certainly would be if we could imagine the thing to be peopled all round "antipodes" people who says the Dic. are living on exactly the opposite side of the earth to ourselves have their feet opposite to us people who are hanging their heads downwards whilst we are standing heads up. But since the theory allows us to travel to those parts of the earth where the people are said to be heads downward & tell to fancy ourselves to

be heads upward & our friend whom we have left behind heads downwards it follows that the whole thing is a myth - a dream - a delusion - & a ruse & instead of there being any evidence in this direction to substantiate the pop. theory it is a plausible  
33 If we examine a true picture of the distant horizon, or the sky itself, we shall find that it coincides exactly with a perfectly straight level line. Now since there could be no horizon if the earth were a globe: if we find it to be the case all over the Earth it is a proof etc.

36 If we take a journey down the Chesapeake Bay, by night, we shall see the light exhibited at Sharpe's Island for an hr. before the steamer gets to it. We may take up a position on the deck so that the rail of the vessel's side may be in a line with the light & in the line of sight & we shall find that in the whole journey the light

will not vary in the slightest degree in its apparent elevation. But, say that a distance of 13 mls has been traversed the Astronomer's theory of "curvature" demands a difference (one way or the other) in the apparent elevation of the light, of 112 ft 8 ins. Since however there is not a difference of 112 lines breadth, we have a plain proof that the water of Chesapeake Bay is not curved which is etc.

37 If the earth were a globe, there would, very likely be (for nobody knows) 9 mos. night at the Arctic & Antarctic regions as ast. dare to assert, here is: - for their theory demands it - But as in fact the 9 mos. day to 9 mos. night is nowhere found but in the Arctic regions it agrees perfectly with every thing else that we know about the earth as a plain & indisputable overthrow of the "accepted theory" - furnishes a striking proof etc.

38 When The Sun crosses the equator, in March & begins to circle round the heavens in N. latitude, the inhabitants of high N. latitudes see him skimming round their horizon & forming the break of their long day, in a horizontal course, not disappearing again for six months, as he rises higher & higher in the heavens whilst he makes his 24 hr circle until June, when he begins to descend & goes on until he disappears beyond the horizon in Sept. Thus in the N. regions they have that which the traveller calls the "Midnight Sun" as he sees that luminary at a time, when in his more southern latitude it is always a midnight & if true for one half the year we may see for ourselves the sun making very great circles round the heavens; it is presumptive evidence for the other half year he is doing the same although beyond the boundary of our vision. This by etc.

- 39 We have abundance of evidence that the sun moves daily round & over, in earth in circles concentric with the N. region over which hangs the sun but since the theory of the earth being a globe is connected with the theory of its motion round the sun in a yearly orbit it falls to the ground when being the evidence which we possess in so many forms etc.
- 40 The Suez canal which joins the Red Sea with the Mediterranean is about 100 mls. long, it forms a straight & level surface of water from one end to the other & no allowance for any supposed curvature was made in its construction. It is a clear proof etc.
- 41 When the ancient world was necessary to make allowance for curvature in canal construction, it is of course, in order, that in their ideas, a level surface may be had for the water. How flagrant then do they contradict themselves when they say that the curved surface of the

earth is a true level? Since they contradict themselves in such an elementary point as this, it is evidence that the whole thing is a delusion & we have  
 42 One circumstance which attend bodies which are caused merely to fall from a great height prove nothing as to the motion or stability of the earth, since the degree of it be on a thing that is in motion, will participate in that motion; but if an object be thrown upwards from a body at rest, and again from a body in motion, in circumstances attending its descent will be very different. In the former case, it will fall, if thrown vertically upwards at a place from whence it was projected; in the latter case it will fall behind the moving body, from which it is thrown & leave it in the rear. Now, fire a gun muzzle upwards, accurately in the ground; fire off a projectile & it will fall by the gun. If the earth

travelling 1,000 mls a min. The projectile would gain behind the gun, on the opposite direction to that of the supposed motion. Since then, this is not the case in fact the Earth's assumed motion is negatived we have etc.

49 It is in evidence that, if a projectile be fired from a rapidly moving body in an opposite direction to that in which the body is going it will fall short of the distance ~~of what~~ <sup>at which</sup> it would reach the ground if fired in the direction of motion. Now since the earth is said to move at the rate of 69 mls per sec. from W to E. it would make all the difference imaginable if the gun were fired in an opposite direction. But, as in practice, there is not the slightest difference from ever way <sup>or</sup> way may be done we have a credible overthrow of all fancies relative to the motion of the earth a striking proof etc.

50 see Ast. Royal of England George B. Airy  
a well celebrated work on Ast. "91

49, "much received" says Jupiter is a large planet  
I agree on this account, I say do not we turn?  
Of course, the common sense reply is because the earth is not a planet. Then, therefore, an Ast Royal  
puts words in our mouth whereunto we may over-  
throw the supposed planetary nature of the  
Earth we have not far to go to pick up a etc

50 It has been shown that an E or W motion is  
necessarily a circular course round the h. centre  
the only centre of motion of the heavenly bodies  
known to man is that formed by the h. star which  
over the C of outstretched earth. When Ast tell us  
of a planet moving a W course round the Sun  
the thing is as meaningless to them as it is to us,  
unless they make the Sun the h. centre of motion  
which they cannot do! Since in the origin which  
then is as the planets have us on the face of it,  
absurd & since as a matter of fact the earth  
can have no absurd motion at all it is den-

It cannot be, what Art says it is - a planet & not a planet or a comet.

48. In Mr. Lenoir's Essay pp. 11 a ship is represented as sailing away from the observer & is given in 3 positions or distances away from the observer. In the first position the mast appears above the horizon, & consequently, higher than the observer's line of vision. But in the 2<sup>d</sup> & 3<sup>d</sup> positions representing the ship as farther & farther away, it is drawn higher & still higher above the line of the horizon. Now it is utterly impossible for a ship to sail away from an observer, under the conditions indicated, & to appear as given in the picture. Consequently the picture is a misrepresentation, a fraud, a disgrace. A ship starting to sail away from an observer with her mast above his line of sight, would appear, indisputably to go down & still lower down towards the horizon line & could not possibly appear - to any one with his vision undistorted as going in any other direction.

curved or straight. Since then the design of the Art artist is to show the earth to be a globe, & the points in the picture, which would only prove the earth to be cylindrical if true, ARE NOT TRUE, it follows that the Art artist fails to prove <sup>his own</sup> artificiality, either that the earth is a globe or a cylinder & we have... a reasonable etc.

49. It is a well-known fact that the clouds are seen moving in all manner of directions - yes, frequently, in different directions at the same time from W to E being as frequent as any other. Now if the earth were a globe revolving through space at 9 mps per sec from W to E, the clouds appearing to move towards the E would have to move quicker than 9 mps per sec. to be thus seen, whilst those which appear to be moving in the opposite direction would have no necessity to move at all, since the motion of the earth would be more than necessary to cause the appearance. But it only takes a little common sense to show us, that it is the clouds that move, and not the earth, as they appear to do & that the earth is motionless, etc.

- 50 We read in the inspired book the Bible nothing at all about the earth being a globe or a planet from beginning to end, but hundreds of allusions there are in its pages which could not be made if the earth were a globe, & which are therefore raised by the astronomer to be absurd & contrary to what he knows to be true. This is the groundwork of modern infidelity. But since every one of the many, many allusions to the Earth & heavenly bodies in the Script. can be demonstrated to be absolutely true to nature & we read of the earth being "stretched out" "above the waters" as "standing on the water & out of the water" from which to take all the proofs we read, but we just put down our proof the scriptural proof that the earth etc.
- 51 A standing order exists in the English Houses of Parliament that in the cutting of canals, &c the datum line employed shall be a horizontal line which shall be the same throughout the

- whole length of the work. If the earth were a globe the "order" could not be carried out but as it is carried out it therefore is a proof etc.
- 52 It is a well known & indisputable fact that there is a far greater accumulation of ice S of the equator than there is at an equal lat. N. & it is said that at Kerguelen 50° S 18 kinds of plants exist while in Iceland 15° nearer the N. Centre 870 species are to be found & indeed all the facts of the case show that the Sun's power is less intense at places on the S regions that it is at corresponding lat. N. Now on the Newtonian hypothesis this is inexplicable while it is strictly in acc. with facts by carrying out of premises involved in the 2d Philo. This is a proof etc.
- 53 The sun is as long S as N of the equator & if the earth were not only stretched but turned under as the Newtonian theory suggests it would certainly

get as intense in a short S or N. but the S region being more east. he has to go further in order to get round in 24 hrs. & his influence has ten times as much to accumulate at any point. Since the fact could not be in the case of the earth was a globe at all.

54 The aeronaut is able to start his balloon & remain for hrs. in the air at an elevation of sev. miles & come down again in the same parish from which he ascended. Now unless the earth drag the balloon along with it in its 19 mile a sec motion it must be left far behind in space, but since balloons have never been known thus to be left it is a proof that the earth does not move & that etc.

55 The Newtonian theory of ast. requires that the moon borrow her light from the Sun. Now since the sun rays are hot & the Moon by it sends with it no heat at all it follows that the sun & moon are 2 great lights, that fire heat & light is a mistake & ∴ we have a proof etc.

56 The Sun & Moon may often be seen high in the heavens at the same time, the Sun rising in the E & the moon setting in the W. the Sun light positively putting the moon light out by sheer contrast. If the accepted Newtonian theory were correct & the Moon had her light from the Sun she ought to be getting more of it when face to face but as her light falls before the rising sun it is a proof that the theory falls & given us a proof etc.

57 The Newtonian hypothesis involves the necessity of the Sun in a lunar eclipse being on the opposite side of a globular earth to cast its shadow on the Moon; but since eclipses have taken place with both the Sun & Moon above the horizon; it follows that it cannot be the shadow of the earth which eclipses the Moon, that the Newtonian theory is a blunder & that it is nothing less than a proof etc.

57 It have never agreed among themselves about a rotating Moon revolving round a rotating & revolving Earth - the earth from planets & their satellites all at the same time dashing through space around the rotating & revolving Sun towards the Constellation Hercules at the rate of 4,000,000 per day & they never will  $\infty$ . With the earth in a plane & without motion the whole thing is clear. And if a stream will show which way the wind blows this may be taken as a pretty strong proof etc.

58 M "I" says "the sun is so far off that even moving from one side of the earth to the other does not cause him to be seen in a different direction at least the direction is too small to be measured" how soon we know that N. of the equator say  $45^\circ$  we see the sun at midday to the S & that the same distance S of the equator we see the Sun at midday to the N. our very shadow on the ground on almost against the

delusionary of the day & give us proof etc.  
60 There is no problem more important to the Art than the Sun distance from the earth. Every change in the estimate changes everything now since modern art. in the estimates of this distance have gone all the way along the line of figures from 3 to 104 & today the distance being 93 it matters not much for not many years ago Mr Hind gave the distance accurately as 95,370,000 it follows that they don't know & it is foolish for any one to expect they ever will know the Sun distance & since all this speculation & absurdity is caused by the assumption that the earth is a wandering heavenly body, & all is swept away by a knowledge of the fact that the earth is a plane, it is clear proof etc.

61 It is plain that a theory of measurements without a measuring rod is like a ship without a rudder; that a measure that is not fixed forms no measuring rod at all, & that as modern theoretical astronomy depends upon the Sun's distance from the earth or its measuring rod, & the distance is not known, it is a system of measurements without a measuring rod - a ship without a rudder. Now since it is not difficult to foresee the dashing of this thing upon the rocks on which Zet. Art is founded it is a proof etc.

62 It is commonly asserted that the earth must be a globe because people have sailed round it. Now since this implies that we can sail round nothing unless it be a globe & the fact is well known that we can sail round the earth as a plane, the assertion is ridiculous & we have another proof etc.

63 It is a fact not so well known as it ought to be that when a ship on sailing away from us has reached the point at which the hull is lost to our unaided vision a good telescope will restore to our view this portion of the vessel. Since telescopes are not made for people to see through a hole of water it is clear that the hulls of ships are not behind a bill of water though lost to the unaided vision it is a proof etc.

64 Balloon. Since we may search amongst the laws of optics in vain for any principle that would cause the surface of a globe to turn its face upwards in case of downwards - it is a clear proof etc.

65 The Rev D. Olmstead in describing a diagram which is supposed to represent the earth as a globe with a figure of a man stretching out at each side one hanging his head downwards. We should dwell on this point until it appears to us

truly up" has a system of philosophy which really requires us to do a thing which is out of our minds, by dwelling on an absurdity until we think it a fact cannot be a system based on Gods truth which never requires anything of the kind. Since the pop. theory of art. of the day requires this it is evident that it is the wrong thing & the conclusion furnishes us with a prophecy.

66 It is often said that predictions of eclipses prove not right - in their theories. It is well known that Ptolemy predicted eclipses for 600 years on the basis of a plane earth with as much accuracy as they are predicted by modern astronomers. If then the predictions prove the truth of the particular theories current at the time they just as well prove one side of the question as well as the other, & enable us to lay claim to a proof etc.

67 700 miles is said to be the length of the great canal in China. When this canal was formed

no allowance was made for curvature. Yet this canal is a fact without it. This is a Chinese proof etc.

68 Mr J. R. Hockyer says "Because the Sun seems to rise in the east & set in the W. the earth really spins in the opposite direction that is from W to E. Now this is no better than were we to say because a man seems to be coming up a St the St is going down to the man & since true science would contain no such nonsense as this it follows that the so called science of theoretical astronomy is not true & a prophecy.

69 Mr Hockyer says "The appearances connected with the rising & setting of the sun may be due to either our earth being at rest & the sun & stars travelling round it or the earth itself turning round while the sun & stars are at rest. Now since true science does not allow of any such beggarly alternatives as these it is

plain that modern theoretical ast. is not true science & that its leading dogma is a fallacy. We have then a plain proof etc.

70 Looking at in describing his picture of the supposed proof of the earth's rotundity uses these words "Diagram showing how when we suppose the earth is round we explain how it is that ships appear at sea as they do" This is utterly unworthy of the name of science. A science that begins by supposing & ends by explaining the supposition is from end to end a mere farce. The man who can do nothing better than amuse themselves in this way must be denominated an dreamer only & their leading dogma a delusion. This is proof etc.

71 The astronomer's theory of a globular earth necessitates the conclusion that if we travel S of the equator to see the R. Star is impossible - but it is known that this star has been seen 22° S the fact like hundreds of others - puts the

theory to shame & gives us proof etc.

72 In consequence of earth's rotundity walls of buildings are nowhere parallel. Since observation fails to find any evidence of this want of parallels in which theory demands the idea must be renounced as being absurd & proof etc.

73 Ast. have made experiments with pendulums which have been suspended from the interior of high buildings, & have exulted over the idea of being able to prove the rotation of the earth on its axis by the varying direction taken by the pendulum over a prepared table underneath - asserting that the table moved round under the pendulum, instead of the pendulum shifting & oscillating in different directions over the table! But since it has been found that, as often as not, the pendulum went round the wrong way for the "rotation" theory chagrin has taken the place of exultation & we have a proof of the failure of ast. in this effort to substitute <sup>theory</sup> ~~theory~~ etc.

74 As to the supposed motion of the whole solar system through space the Rev. Royal of England once said "The matter is in a most delightful state of uncertainty & I shall be very glad if any one can help us out of it" But since the whole Newtonian scheme is today in a most deplorable state of uncertainty - for whether the earth goes round the moon or the moon round the earth has for years been a matter of raging controversy it follows that root & branch the whole thing is wrong & all hot from the raging furnace of philosophical phrenzy, we find a glowing proof etc.

75 Considerably more than a million suns would be required to make up a body like the Sun the ant. tell us & more than 53,000 suns would be wanted to equal the ind. contents of the star Vega And Vega is a small star & there are countless millions of these stars and it takes 30,000,000 years for the light of some of these stars to reach us at 12,000,000 miles a minute & says Mr "Pride"

I think a moderate age of the earth would be 500,000,000 years its weight says the same individual is 6,000,000,000,000,000,000 tons. Now since no human being is able to comprehend these things the giving of them to the world is an insult - an atony And though they have all arisen from the one assumption that the earth is a planet, instead of upholding the assumption they deny it shown by the weight of their own absurdity & leave it lying in the dust a profane

76 J. R. Young in his work on navigation says "Although the path of a ship is on a spheroidal surface we may yet represent the length of the path by a straight line on a plane surface." (plane sailing & the like.) Now since it is altogether impossible to represent a curved line by a straight one & absurd to make the attempt it follows that a straight line represents a straight line & not a curved one.

& since it is the ~~surface~~ surface of the water of the ocean that is being considered by Mr Young

it follows that its surface is a straight surface & we are indebted to Mr. Yong a prof. of navigation for a proof etc.

77 Jumbling over edge & ice. Carrier a prof etc.

78 Yes but we can circumnavigate the S easily enough it is often said by those who don't know. The Brit. ship Challenger recently completed the circuit taking 3 yrs of traveling 69,000 a stretch long enough to have taken her 6 times round on the globe by hot air. A proof etc.

79 Circulus dark donkey & statue. Balloon etc. proof etc.

80 It is supposed in the regular course of the Northern Hemisphere that the earth is in June 1900 from where it was in Dec. Since we can in middle N lat. see the star on looking out of a window that faces out of the very same corner of the very same pane of glass throughout the year it is proof for any man on his senses that we have no motion at all

of a proof etc.

81 Antiquarian philosophers teach us that the moon goes round the earth west to east. But observation shows most certain means of gaining knowledge show us that the moon never ceases going round from east to west. Since then nothing can possibly move in two directions at the same time it is proof that the thing is a big blunder & in short a proof etc.

82 Ast. tells us the moon goes round the earth in 28 days. Well we may see her making the journey round every day if we make use of our eyes. The moon falls behind in her daily motion as compared with that of the sun to the extent of one revolution in the time specified but that is not making a revolution. Falling to go as fast as other bodies in one direction does not constitute a going round in the opposite one as ast. would have us believe & some all this absurdity has

been rendered necessary for no other purpose than to help  
 other absurdities along it is clear that the Art are on  
 the wrong track & leads no long train of reasons  
 to show that we have a proof etc.

83 Meridians are necessary straight lines & it is not  
 to travel round the earth in an N & S direction  
 from which it follows in the gen acct. that of the  
 word degree  $\frac{1}{360}$  of a circle. meridians have no degrees  
 for no one knows of a meridian circle or semi  
 circle to be thus divided. But not. a part of  
 deg. in lat just the same as deg. in long.  
 This is done by assuming that to be true which is  
 not true. Let philo. does not involve this  
 & proves that the basis of the philo. ophy is sound.  
 & in short etc.

84 If we move away from an elevated object on a  
 over a plain or a prairie the height of the object  
 will gradually diminish if we do so. Now that  
 which is sufficient to produce the effect on a small

scale is sufficient on a large one & travelling  
 away from an elevated object no matter how high  
 over a level <sup>level</sup> elevated surface, no matter how far we  
 come the appearance in question - the lowering of the  
 object. Our modern Theoretical Art. in the case  
 of the apparent lowering of the h. stars as we  
 travel southward assert that it is evidence that  
 the earth is globular. But as it is clear for a  
 appearance which is fully accounted for on the  
 basis of known facts cannot be permitted to  
 figure as evidence in favour of that which is  
 only a supposition; it follows that we ought  
 fully order it to stand down & make way  
 for a proof etc.

85 There are rivers which flow E. W. N & S  
 & rivers are flowing in all directions over the  
 earth's surface at the same time. Now if the  
 earth were a globe some of these rivers would  
 be flowing up hill & others down taking it

for a fact that there really is an up & down in nature  
whatever form she assumes. But since rivers do  
not flow up hill & the glob. theory requires that  
they should it is proof etc.

80 If the earth were a globe rolling & darting  
through space at the rate of 100 mls in 5 sec.  
the water of the seas & oceans could not by any  
known law be kept on its surface the assertion  
that they could be retained under these  
circumstances being an outrage upon human  
understanding & credulity but on the earth  
i.e. the habitable world of dry land is found to  
be stretching out of the water & in the water  
of the mighty deep whose circumference  
& bounding is as we may thus back <sup>the statement</sup> the truth  
of those who make it & flout before them  
since the fly & worm & common sense inscribed  
with a pen etc.

87 The Theory of a rotating & revolving earth

demand a theory to keep the water on its surface  
but as the theory which is given for this purpose  
is as much opposed to all human experience as  
the one which it intended to uphold it is an  
absurd. of the miserable makeshifts to which art.  
are compelled to resort & affords a proof etc.

88 If we could after our minds had once been  
opened to the light of truth conceive of a  
globular body on the surface of which human  
beings must exist the power no matter  
what name it may be called <sup>that</sup> would hold  
them on would then having to be so necessarily  
constraining & cogent that they could not  
live. the waters of the ocean would have to  
be as a solid mass for motion would be  
impossible. But we not only exist but  
live & move & the water of the ocean stirs &  
dances like a thing of life & beauty this  
is a proof etc.

contd at back on page 53

De Ford

## Gravitation

Prof. Laing: Gravity is the pull that all bodies exert on each other

Popular Science Recreations by G. Ferrandier  
No. 486 & 487

Gravitation is the force which keeps the planets in their orbits.

also Every object in the universe tends to attract every other object in proportion to the quantity of matter of which each consists.

H. V. Stephen Gravity is the tendency of all bodies in the universe to pull all other bodies down upon themselves.

Webster's Unabridged Dictionary  
The tendency of a mass of matter towards its central body

The tendency of all matter in the universe toward all other matter  
Newton x Every particle in the universe attracts every other particle with a force directly proportioned to the mass of the attracting proportion and inversely to the square of the distance between

### Proposition 1

Take tector board with 2 equal weights at each end & they would each balance one another hence we have mass acting against equal mass equal weight against equal weight equal force pitted against equal force & the instant either exerts a greater force the law of equality is

evolved and it becomes unequal.

proposition 2

Every mass rough or smooth regular or irregular must have a centre of gravity according to this universal law the centre is the point on which the mass must balance.

Gravity is said to act towards the centre of the mass.

All sections of a sphere exert all their force power or pull on their opposite sections, so section F cannot reach out to pull section A, because it exhausts all its force on H a mass equal to itself on the opposite side of the pivot & the same applies to H & K.

Every mass must have a pivotal centre & cannot act beyond its own circumference therefore impossible for any sun, planet or globe to exert power of attraction outside its own circumference. Or is it true that section H ignores F & reaches out to A & F passes over under or around H and thus draws K toward itself. If two balls of equal quantity are placed against each other all the attractive power of one would be neutralized met & balanced by the other so neither could attract anything else.

Hit 2 haws of equal strength together & let them pull against each other where will they move? then how can they pull on some other object at the same time. There can be no centre without equal masses in opposition. Matter could only

exist in aggregate & never in the segregate  
if this Law were true, universal gravitation  
Separation then is impossible.

equal opposing forces prevent motion

### Proposition 3

The action of the force of gravitation  
violates the Law of action of all other  
known forces. All known force is  
eccentric, expansive & repulsive which  
is just the opposite to attraction.

examples dynamite, steam, powder,

heat, electricity, gas, air, lightning  
& even the living cell. They operate outwardly  
from their centres or sources. So that if  
matter exerted any force at all it would  
be eccentric and all bodies would be  
driven apart instead of drawn toward  
each other. Only by some intelligent  
mechanical device can force be made to draw

objects concentrically. If there is such  
an gravitation it must be repulsive &  
not attractive.

### Proposition 4

The Sun is supposed to be centre of gravitation  
but the sun could not possess power of gravity  
because heat is expansive. The sun is pouring  
forth enough heat every second to melt a  
column of ice 2 1/2 miles square reaching from  
the earth to the sun and in 8 seconds of time  
it could turn the solid ice into steam

this equals 581,250,000 cub mls of solid ice.

Now figure out now much attraction of gravitation  
a body of such immense heat would have.  
Do not scientists know that they teach that it was  
that eccentric, outward, expansive repulsive  
force of the nebulous mass which originally  
threw off the earth & planets. Was it not  
the repulsive force of heat? Now they want us

to believe that the same force attracts that which  
it originally threw off. (repulsed) If so  
what reversed its action? is repulsion attraction?  
How much attraction would the most powerful  
electric furnace exert on a fly or an ant?  
On the principle it is positively certain that neither  
the sun a fiery, scorching nebular mass nor  
the molten interior of the supposed globe would  
ever tend to draw anything toward itself.  
Is it the attractive or expansive force of heat  
which melts ice and ripens our fruit or corn.

### Proposition 5      TIDES

Scientists tell us that tides are caused by the  
attraction or pull of the sun & moon on the water  
high tide occurring when sun & moon are on the  
same side of earth. On the other side they are  
supposed to be pulling the earth away from  
the water

Illustration

but high tides occur at the time of full moon when  
she is on the opposite side of the earth from  
the sun then they are both pulling in opposite  
directions eg. see 12. If gravity caused tides  
on the ocean it should do so on ponds &  
lakes and on the Mediterranean Sea.  
What is gravity doing or not doing here why  
should no gravity be felt on that vast  
area of 1,000,000 sq. mls. Is it too  
fresh or too salt? If gravity is so powerful  
as to lift the vast earth on the opposite side  
from Sun & Moon why cannot it lift a  
man or feather off the earth when directly  
under the Sun? could not wind move  
smaller & lighter objects before the  
heavier ones?

If indeed it is the moon pull which causes high tide or any tide at all it certainly follows that high tides would be given on any meridian at the same time that the moon passed the meridian that is directly under the moon. Sir A. Ball "Tides & Tides" pp. 18-24 says that such is not the case. He informs us at some ports this is true but at some places it is low water directly under the moon when the moon is on the meridian of that place what he says: - "Even around our own coasts the discrepancies are such as to utterly discredit the theory (of equilibrium or high tide always under the moon) At Aberdeen high tide does not appear until an hour after the doctrine would suggest 2 hrs late at London, 3 at Lynmouth, 4 at Inverness, 5 at Sligo & 6 at Hull This last port would indeed be the haven

of refuge for those who believe that low tide ought to be under the moon. At Hull this is no doubt the case then if at all other places the tide behaved as it does at Hull it might follow that the Law of Low water was generally true. At Bristol the high tide does not get up until 7 hrs after the moon surpassed the meridian at Arklow the delay is 8 hrs at Yarmouth it is 9 at the Needles it is 10 hrs late whilst the moon has nearly got back again before it drags the tide up at Liverpool. Even ports on the vast ocean give a very uncertain response. Kerguelen Island & Santa Cruz may seem to prove that high tide occurs under moon but unfortunately Fiji & Ascension that beneath the moon is invariably the home of low water." So these facts show there is no connection between

11  
the moon and the tides. At Tahiti they have tides at noon & midnight without variation. I ask does the Sun & moon or the Sun or moon always pass the meridian of Tahiti at noon & midnight all the year round?

The earth is 88 times larger than the moon. The sun's gravity on the earth is ~~more than~~ to the moon's gravity as 3 is to 5. i.e. while the moon exerts 5 lbs or units the sun exerts 3. Then while the ~~sun~~ moon exerts 1 lb the sun exerts  $\frac{3}{5}$ . Then the two together exert but  $1\frac{3}{5}$  units against the earth's 88 units of gravital force. The earth acts at home, she is on the defensive she holds on to her particles with the force of 88 units against  $1\frac{3}{5}$ . Now will you tell me now the sun & moon's pull can overcome more than 44 times the earth's

12  
pull & cause the tides? Does not this prove again that those bodies have nothing to do with pulling the tides up?

Proposition 6      DEVASTATION CERTAIN

Equatorial speed of earth <sup>on axis</sup> 17 miles per minute  
pull of sun & moon said to be strong enough to move the earth - pull it away from the water & produce tides. It makes no as to results whether it moves against stationary objects or whether it is stationary and objects move against it. eg. Take two balls of equal size & weight & throw 1 against 2 with a definite force & a definite result will be produced. Now throw A against B with an equal force & an equal result will be seen. Bump your head against a still object & it hurts just the same as though you were still & the object struck you with equal force. We know the force of

gravity is not claimed to be a material substance yet we know the destructive power of dynamic force which is a material substance. So let a wind force or a steam force or a dynamic force or an electrical force or the force of gravity whether in a push or a pull strong enough to move this vast earth past over it at <sup>the speed</sup> the rate of 17 miles per minute & note the results. If it was a pushing force everything would be smashed down & driven into the sea or earth if it were a pulling force everything would be lifted bodily off the earth & sea & in either case the whole face of the earth would be devastated. No wind, hurricane or cyclone strong enough to move this earth has ever been known, yet a very gentle wind moves light objects; and hurricanes & cyclones are very destructive. There have been terrible explosions of dynamite & nitroglycerine

but they have not shaken the earth even though destroying much property & taking many lives. Canle earthquakes have swallowed up cities killing thousands & do. of people but did not move the earth. These disasters were caused by the force of these destructive agencies. What then must be the result of the force of gravity passing over the surface of this earth at the rate of 17 miles a minute if that force is great enough to move the earth & does ~~not~~ actually move it? We don't feel this force but we do feel the force of the slightest wind. How we have been fooled! even more the whole so called globe itself would be moved out of its place and according to the philosopher 3rd Law of motion it would pass on for ever in a direct line unless <sup>again</sup> interfered by some other power outside itself. Shall I quote

you that Law. It expresses simply the inertia of matter thus "A. body at rest will forever remain at rest unless some power outside itself starts it into motion. A. body in motion will continue to move on forever in a rectilinear course (straight line) unless some power outside of itself interferes with that motion." This defined simply means that no dead body can either start or stop itself. We are gravely told it can pull something else toward itself. Profound philosophy I wonder great thinkers don't think on their own thoughts. The sun being 1,300,000 times larger & that times stronger than our earth & pulling the earth toward himself, when once he got the earth into motion as he does in the case of ice production that motion must necessarily be in the direction of the pulling

power, the sun the earth must inevitably be drawn into the sun as that pulling power is constant & persistent. The greater pull of the sun must overcome the weaker pull of the earth even though the earth resisted but the earth is pulling the sun down toward itself or itself toward the sun & not resisting. If a fisherman pulls in a fish what does the fish do? If gravity pulls when the sun got the earth started it would draw the earth to itself. But if it pushes it would drive the earth farther & farther away earth from the sun all the time. Again gravity if existing extends outwards direct from sun to earth is constant & persistent, its force is felt from pole to pole. Imagine gravity as a great sheet of iron held down from the sky to the earth, the earth spinning against that force at the

rate of 17 miles per min, bumping our heads, houses  
trees & mountains against this great solid wall  
of force & we can easily conceive the terrible  
destruction that would follow. In these not  
such a wall of force against which we are  
whirling faster than a hurricane of gravity  
does reach down from the sun & mass &  
move the earth. Does not gravity change its  
point of contact coincident with light of sun  
& turn of earth so that it has to get a  
fresh hold every second? If it is always  
going outward how can it draw anything  
toward the sun unless it reverses its force  
& turns back? Why should it turn back  
on reaching the earth & want to draw it to  
the sun? If a man wants to pull  
anything toward himself, he first extends  
his hand & then on reaching the object draws  
it back. How does gravity do it?

## 7th Concentration

Astronomers tell us that all bodies have a  
tendency to rush together in one mass by means  
of the force of the attraction of gravitation.  
In fact this force is this tendency. Thus a  
swarm of bees. What is to hinder them?  
And this tendency to all rush together into  
one mass is constant & persistent therefore they  
are always making an attempt to rush  
together. How is it they don't accomplish  
their purpose? One writer slyly informs us  
that the planets are anxious to all rush to-  
gether & that the nearer they get the greater  
becomes this tendency. So I as slyly  
ask why do they not all rush together into  
one mass seeing there is nothing between  
them but empty space? It is a clumsy  
device for the astronomer to prevent another  
force to hinder the planets embracing one

another. This they call the centrifugal force. It flows from the centre. But this is just what gravity is supposed to do. Nothing between you wife & self but space she anxiously constantly & persistently tending to rush to you, you attracting pulling her with a force directly proportioned to the mass of her & still a persistent repulsive force for ever preventing her embracing you. Some philosophy is very profound some science a little hard to grasp. You pull together with her tending to rush towards you is what prevents her rushing off into space. So we have the ridiculous spectacle of an attractive force constantly & persistently pulling everything toward itself & another force driving everything away from everything. They must be equal or the stronger would overcome the weaker & must either have rushed in one mass or all

have been driven further & farther apart. If they are equal forces everything is at a standstill because equal opposing forces prevent motion. This 2 force position is a positive violation of the scientific dictum that "Nature is not superfluous or where only one thing is needed she does not ~~use~~ use two. In this and all other such cases she is superfluous & superfluous because she is using two forces where none is needed. If it was intended by God or Nature that a body should stand still why should one force be set to act on that body to pull it up & an equal force to act in an opposite direction to keep it down? It is monstrous & absurd. The conclusion is absolutely unavoidable that if gravitation existed the earth, sun, moon, stars & planets would all rush

together into one mass that it had been done long ago. That all these bodies never would have been separated by empty space from their primitive nebular mass. If all matter & all atoms of matter have this constant persistent tendency to rush together the perpetual attraction this constant persistent & everlasting pull.

Matter could only exist in the aggregate i.e. in one vast mass & never in the segregated i.e. individual body. Since we know that all force is eccentric, outward, repulsive & not attractive or concentric & since we know that no such condition as described was obtained & never will obtain ∴ we know that there is no such constant persistent powerful tendency or attempt & that gravitation is a scientific myth - a universal fake.

8th Prop. A. Dead Standstill

It is this pull that holds the planets in their orbits & prevents them from rushing off into space. The planets are all trying to rush to the sun & the sun is working overtime in a mighty effort to prevent them rushing off into space by pulling on every one of them by all the power of every particle of matter in this vast mass. We are told that all planets once did rush off into empty space from their primitive nebular mass. Something stopped them in their mad rush. It was gravity pull of the sun which stopped them. A moving body is a resisting body. It takes more force or power to stop a body moving away from you than it takes to draw in a still body to you. Therefore if the sun continued to exert the same force on the planets after

he got them stopped that he did to stop them they would be drawn back to the sun as previously argued. If the sun centrifugal force exceeded his attractive force the planets have run on forever into space. If attractive & centrifugal forces are equal, then the planets are at a dead standstill.

If there is force exerted in matter now they must always have exerted in matter. They therefore existed in the nebulous mass which originally constituted the universe.

If equal now they must have been equal then. Therefore the planets never left their primitive mass. Equal opposing forces prevent motion. Matter then only exists in the aggregate & <sup>not</sup> in the separate. <sup>It</sup> even there are no planets. This force is not focused at one point on

the earth's surface or a line extending from the Pole but is directed to the whole half of its surface covered by the sun light.

<sup>4</sup> One claim is that the earth is actually suspended from the sun by means of the force of gravity. If you take a string round a ball & you would only be able to swing it in a lateral direction or side constantly turned toward the hand & the other away. Now you could never spin the ball vertically on its axis. No planet then suspended & would spin on an axis nor revolve round the sun causing day & night & the change of seasons. If <sup>4</sup> the cord side held fast to the sun it must revolve round & round the sun as the ear in circles round the sun. Stretch imagination so far as to consider gravitation as a material substance & centered in both earth & sun like ball & string.

Gravity must be broken before the motions could take place. Gravity does not seize the globe along a westerly belt & then give it a sudden pull eastward & then let loose & grasp again, but its impulse is steady and constant. While its force is acting, pulling at the eastern side the southern northern & central portion of the whole half of its surface so the globe could never spin with this force applied to it on every side. If its force was broken so that the earth could spin it would fall away from the sun & go off into space forever in a straight line. So instead of causing the planets to spin as scientists postulate it would stick the motion of every body in the universe & lay them all to a dead standstill. If our earth were tied to the sun with this cord of gravity one side would forever be under

the scorching fiery rays of the sun in perpetual day with a never changing summer while the Antipodes would remain in a gloomy darkness & a frigid & eternal night of winter. Since no such conditions are known I am forced to the inevitable conclusion that Universal Gravitation is one of the greatest deceptions ever foisted upon an overcredulous world.

#### WEIGHT

Weight is scientifically defined as "A measure of the force of Gravity" A common experience or two will illustrate what weight is. It has been shown conclusively in the foregoing argument there is no such thing as U. Gravitation  $\therefore$  without further proof W. is not a measure of the force of gravity. It is really a comparison of mass with

man as regards density, solidity & compactness.

Let a man & horse side by side pass across swampy ground. They will both sink, the man more & the horse more. We say the horse sinks deeper because he is heavier than the man. Weight of man say 170 lbs horse 1200 lbs. This is said to be measure of gravity on the two bodies. It is really a comparison of man with man. Horse sinks deeper because he is greater mass & the horse's mass is not acting against the main body, but each horse & man act against a mass of mud. The greater mass of the horse's body compared with his bulk displaces a greater mass of mud than the man's body displaces, so the horse sinks in deeper than the man. And each sinks into the mud because each presents to the mud a more solid &

compact mass than the mud which it displaces. Now let them walk across the same ground when it is frozen or dry. Will they sink in? Do they weigh less on the scales? But now they meet a solid, dense compact earth solidified by freezing or drying. They weigh just as much on the solid earth as they did before; that is gravity pulls just as hard at one place as at the other, just as much at one time as at the other. The same fact is shown of a man or multitude swimming in a pond of water in summer & skating across the same water frozen in winter. The weight is just the same only ice is solid & water liquid so people walk on ice & swim in water. Let him stand on an ice hill till it melts under him. He is no heavier but sinks. Why?

Drop a stone from a bridge into the water below. The stone passes through the thin air, the more solid water into the mud below & comes to rest on the solid earth beneath the mud. The solid earth was any yielding, the mud more yielding, the water more and the air most of all. But why do not objects fall upwards? Gravity is supposed to act in every direction especially upwards, while weight tends downwards. We must be careful to distinguish between inherent weight & extraneous gravitation. If gravitations were strong enough to move the earth as it is said to do in producing the tides it would certainly pull all those loose objects away from the earth before it could move the earth & so they would fall upwards. Objects must

move in the direction of the force which moves them. The objects of Scientists tell us that the combined pull of the sun & moon moves the earth in producing the tides. How can a sound mind admit the idea that the earth is moved by gravitation when men, houses & other detached objects remain undisturbed. The wind which would throw down your hat would hurl you off the roof before it would move the house. Yes some winds throw you off the roof & do not move the house. And when it did throw you off it would carry you in the direction of its own motion and you would say out once that the force of wind was outward from its source.

The Builder & Maker of all things purposed & ordained a position for all

things when moved out of that place they naturally seek it again. We admit there is a force compelling driving things downward to the earth. That great Being who upholds all things by the power of his word has ordained that when free to do so, they seek their own level of stability or equilibrium. There is a power behind the facts & laws of nature we freely admit it. We recognize that power as emanating from an intelligent Being the great God who created us all.

Goethe calls Gravitation a "A horripolous, an unnatural theory".

"Attributing such a power to mere matter, which is passive by nature, is a supreme illusion"

Prof Bernstein

"If we ask what gravitation is, no man on earth can tell us whether it is solid, gaseous or liquid."

"I think it is all gas." Albert Smith  
Here I rest my case Universal Gravitation has been tried at the bar of reason & has been found to be an unsupported hypothesis a gross delusion.

### -1. PLANE EARTH

In the foregoing argument on the gravity question I consider that I have shown conclusively that there is no such force in existence then it follows without argument that if my position is true, then this earth is at rest it does not spin on an axis to cause day & night, nor revolve in an orbit around the sun causing the change of the seasons. It follows too that the sun, moon & stars are in motion over & above a plane earth. Now laying aside <sup>the</sup> philosophical phase of the subject I wish to present some of the physical evidences that this earth is an

outstretched plane. First of all it looks to be a plane. On those vast prairies of the Mississippi & Canada in N. A. & the Pampas of S. A. the eye is weary with looking at objects away in the distance with no obstruction between & no limitation except the nat. limitation of visual power.

Mr. C. Darwin "Voyages of a Naturalist" p. 166:  
 "The guanaco, or wild llama - Mr. Stiles told me that he one day saw, through a glass a herd of these animals which evidently had been frightened & were running away at full speed although their distance was so great that he could not discern them with the naked eye."

### SCIENTIFIC TESTIMONY

Observations with the eye & practical tests agree. Chambers "Information for the people" p. 59

" 9  
 In N. A. the basin or drainage of the Mississippi is estimated at 1,300,000 sq. miles & that of the St. Lawrence at 600,000 sq. miles while northward of the 50 parallel extends an enormous tract of flat of perhaps greater dimensions. Next in order of importance is that portion of Europe extending from the German Sea through Prussia, Poland & Russia towards the Great Mts, presenting indifferently tracts of heath, sand & open pasture, & regarded by geographers as ONE VAST PLAIN. So flat is the general profile of the region that it has been remarked, IT IS POSSIBLE TO DRAW A LINE FROM LONDON TO MOSCOW, WHICH WOULD NOT PRACTICALLY VARY FROM A DEAD LEVEL."  
 "The Atlas of Physical Geography by T. A. Milner states that

" East areas exhibit a perfectly dead level scarcely a rise existing through 1,000 miles from the Carpathians to the Urals. South of the Baltic the country is so flat that a prevailing N. wind will drive the waters of the Stettiner Haff into the Oder & giving the river a backward flow 30 or 40 miles."

" The plains of Venezuela & New Granada in S.A. chiefly on the left of the Orinoco, are termed llanos, or level fields. Often in the space of 270 sq miles the surface does not vary a single foot."

" The Amazon falls only 12 ft in its last 700 miles of its course; the La Plata has only a descent of  $\frac{1}{33}$  of an inch a mile."

" London Journal July 16th 1857

The chief peculiarity of the view from a balloon at a considerable <sup>elevation</sup> ~~altitude~~ was the altitude of the horizon which remained practically

in a level with the eye at an elevation of 2 miles, causing the surface of the earth to appear concave instead of convex, & to recede during the rapid ascent, whilst the horizon & the balloon seemed to be stationary."

J. Glaisher "Travel in the Air"

" On looking over the top of the car the horizon appeared to be on a level with the eye & taking a grand view of the whole visible area beneath, I was struck with its great regularity; all was dwarfed to one plain; it seemed too flat, too even, apparently, artificial."

M. Camille Flammarion

" The earth appeared as one immense plain richly decorated with ever-rising colors hills & valleys are all passed over without being able to distinguish any undulation in the immense plain."

Ellcott "I do not know that I ever hunted heretofore, that the aeronaut may well be the most sceptical man about the rotundity of the earth. Philosophy forces the truth upon us but the view of the earth from the elevation of a balloon is that of an immense terrestrial basin the deeper part of which is directly under one's feet and as we ~~rise~~ ascend the earth beneath us seems to recede - actually sinks away - while the horizon gradually & gracefully lifts a diversified slope stretching away further to a line that, at the highest elevation, seems close with the sky. Thus upon a clear day the aeronaut feels as if suspended at about at an equal distance between the vast blue oceanic concave above, and an equally expanded terrestrial BASIN below."

Illustration

## LEVEL

Level = "horizontal, even, flat, on the same level of plane." Nuttall's Dictionary, 1892  
"Admon's New Navigation & Surveying"  
says on p. 25

"The spirit level which is usually on the underside of the surveyor's transit instrument, is used to determine a horizontal line. A horizontal line is at right angles to a vertical line. It is a level line."

Illustration

## CURVATURE

The curvature, dip or falling away from the level or horizontal on a globe of 25,000 miles has been computed by "Thames Mathematical Tables" as 7.955 inches to the mile multiplied by the square of the distance. In "Mensuration" by T. Baker C.E., as 7.962 inches.

So now the dead level line from London to Moscow, a distance of 2,590 mls. proves the earth a plane. On a globe of 25,000 the curvature in 2590 mls would be practically 847 mls. The Amazon falls or dips on 12 ft in 700 mls. i.e. if a horizontal line be struck at the given point on the river & continued without curvature the full length of 700 miles it will then be at that point only 12 ft above the surface of the water. The horizontal or level line is tangential to the curved

surface of the earth. Therefore if this level or horizontal line is struck at the surface of the water at one point & carried in a rectilinear course for 700 mls. the distance between that line & the surface of the water is then only 12 ft whereas on a 25,000 mile globe it should be 326,666 ft or over 61 miles. The Nile flows 1,000 miles with only a foot fall. It should be 127 miles. In 1,500 miles from the Carpathians to the Arabs the dip should be 284 miles. The dip in 270 sq miles would be over 170 ft and not a single foot.

## LONG DISTANCE VIEWS

Ships & lighthouses have been seen at sea and from sea at distances ranging up to 200 miles. "Amuse & Amuse" by H. R. Hawiers  
"The Amiens spire is 403 ft high from foot of the tower. Strasburg measures 468 ft from

The level of the sea is under 403 ft from plain.  
 From the steeple of Notre Dame at Antwerp  
 the panorama can hardly be surpassed 126  
 steeples may be counted for & near. Facing  
 northward the Scheldt winds away until it  
 loses itself in a white line which is none other  
 than the N. Sea. By the aid of a  
 telescope ships can be distinguished out on the  
 horizon & the captains declare they can see  
 the lofty spire at 150 miles distant;  
 Middlemarch at 75 miles, Fleesing 65 miles  
 are also visible from the steeple. Looking  
 towards Holland we can distinguish with Breda  
 & Wallade each 54 miles off.

The above spire must be  $2\frac{1}{2}$  miles below  
 the line of sight to the observer 150 miles  
 at sea making no allowance for elevation  
 Chambers Journal 1895 February  
 "A. good many years ago a pilot in

Mauritius reported that he had seen a vessel  
 which turned out to be 200 miles off. This  
 incident caused a good deal of discussion in  
 nautical circles at the time & strange to say  
 a seemingly well authenticated case of the  
 same kind afterwards occurred at Aden.

A pilot there announced that he had seen  
 from the heights the Bombay steamer then  
 nearly due. He stated precisely the direction  
 in which he saw her & added that her head  
 was not then turned toward the port.  
 2 days afterwards the missing steamer  
 entered the port & it was found on  
 enquiry that at the time mentioned by  
 the pilot she was exactly in the direction  
<sup>position</sup> indicated by him, but about 200 miles  
 away. Now allowing a mile for the height of  
 observer above the water the vessel would  
 have been 4 miles below the line of sight.

Observe carefully. The pilot in the lighthouse looks in a straight line off out to sea, along the line "A". His line of sight "A" strikes the water at a distance proportioned to his height above water & passes straight on. That line is tangential to the surface of the water, at the point it strikes the water, & continues so. It does not curve with the curved surface of the water. Therefore the vessel at "K" would be 4 mls below the pilot's line of sight if the supposed curvature existed. But since the pilot could not see in a curved line, nor through a hill of water; & since he did see the

44  
 vessel we conclude this and the many other instances of like character on record prove positively that no such curvature exists on the ocean & that it is level, horizontal, flat a plane. Furthermore the navigator looking towards the lighthouse along line "C" would from a distance of 150 mls miss the light or church spire by about 3 mls. It would be that much too low for the line of sight.

#### PRACTICAL EXPERIMENTS

Experiments have been made which prove that the surface of standing water level, horizontal, flat. etc. Cambridge Bedford level  
 The conclusion was unavoidable that the surface of the water for a length of nine miles did not to any appreciable extent decline or curve downwards from the line of sight.  
 cont. next page.

### HELIOGRAPH

Daily News Feb 2 1900

"Most of the news which has come from Ladysmith lately has been transmitted from the beleaguered town to Gen. Buller on the Tugela by means of either the Heliograph or flashlight. The operator by depressing the key, moves the mirror & so permits the flash of the light to be reflected, a short depression reflects a short flash, & a long depression a longer flash. This enables the Morse alphabet to be used the ordinary dot & dash system of the telegraphic instrument. This distance made by which Capt. W. A. Glassford U.S. Army Signalling Corps was in some experiments in Western America succeeded in opening up & maintaining communication

by Heliograph between Mt. Ellen, Utah, & Mt. Uncampahgre, Colorado 183 miles. He used an 8 inch mirror. No other method of signalling can go nearly as far as the Heliograph. A 2 ft flag signal cannot be seen further than 3 miles with the naked eye or double that distance with a telescope."

Any work on Geometry gives the curvature of the earth as 8 in. for 1<sup>st</sup> ml. & 8 x by sq of number of miles for any distance.

Now a straight line (a line of sight is never curved) running at right angles to the perpendicular at the transmitting station Mt. Uncampahgre "A" would run a tangent from the line of curvature so that in 183 miles the curvature would place Mt. Ellen downwards from the tangent "A" "B" below the line of vision by 22,326 ft. Yet the receiving station on Mt. Ellen was seen on a level

with the eye from Mr Uncompahgre, on a line coincident with the tangent line. The experiment is on record in Washington City. This is another incontrovertible proof that the earth is not a globe but a plane since no object can be seen at such a distance on a globe.

Diagram Harper Weekly Oct 20th 1894.

### Ships' Disappearance

I have now given you the testimony of travelers, accounts & experiments whose operations & observations have covered each continent & the

ocean bed each of which tends to disprove & disprove the globular theory & establish our contention that the earth is a plane. We have shown you too by the experiments conducted on the Bedford level & by the great distance objects are visible at sea & from sea that the ocean & all standing water is level, horizontal, flat. Had we telescopes sufficiently powerful we could see from New York to London. We could see all vessels at high sea between those ports. There is no hill of water to obstruct the view. You ask then why do ships disappear at sea? We are taught that they vanish from sight behind a hill of water, but when they disappear to the unaided eye a powerful telescope will often (bring) restore the whole vessel to full view masts hull & all. If the vessel has really gone behind a hill of water so it cannot be seen with the naked eye it cannot be seen with the telescope as neither the eye nor telescope can pierce a hill of water.

nor look in a curve over it. But vessels many times have been seen with the aid of a telescope.

I fancy that the theory of refraction will be objected at this point yet we know there is such a thing as refraction of light. Let me quote you on this point "Encyclopedea Britannica" article "Leveling" "Refraction acting in such an extremely variable & uncertain manner that of any constant or fixed allowance is made for it in formula or tables it will often lead to a greater error than it was intended to obviate."

But refraction does not occur except when light passes through media of varying densities. In the case of the observer & the ship at sea both are in a medium of unvarying density, the air above the surface of the ocean. There could be no refraction in that case. Look at Fig 11.

Here line A represents the observer's line of sight as he looks down at the fish in the water. But where the ray of light strikes the water a denser medium than the air it is refracted or bent out of its normal course & the image of the fish is elevated & projected forward so that he appears to be at "P'" whereas he is really on the bottom of the vessel. But if the fish were out on the air, or the observer down in the water, there would be no refraction in the case of the fish would be really where he is. Divers are never deceived in the location of objects under water. So as the ship & the observer are in a medium of uniform density, the air, there is no cause for

refraction. If the ship were under the water the light passing from it to the observer out in the air would be refracted. But it is not.

Neither is the observer under the water. Drop a penny in a glass tumbler & you have the lesson clearly before you as in Fig. 11.

### PERSPECTIVE

Account of a ship looking no larger than bird at 1600 ft from ground.

Case A. shows balloon near ground. The eye naturally looks straight to the centre of the object. So the rays of light lines "A" & "B" passing from the outer larger dimensions of the balloon through the lens of the eye form on the retina the image of the entire object, & large because near to the eye.

Observe how these rays of light meet & cross at the centre of the eye. This is a well known law of optics. The nearer the object the larger the image on the retina, and vice versa. Now when the

balloon had receded to "K" the lines "C" & "c" passed to the retina at a sharper angle than did the lines "a" & "d" so that a smaller image is formed on the retina. When an object thus recedes until the lines or rays of light fall on the retina at an angle of 60 or 1 min. of a degree there is no image formed on the retina at all & what is known in perspective as the vanishing point is reached & all objects will disappear there from sight. When this simple law of perspective (which is well known by artists architects & many others) is clearly understood it will explain the vanishing of the bird, the balloon the airdrop, the rising, culminating and setting of the sun, moon & stars, the passing of a cloud & the disappearance of ships at sea.

Your eye is 5 ft from the ground, a pole stands 20 ft high. Fasten a cord to the top of the pole another to the bottom, stand close

to the pole & bring the cords together at the eye.  
 They will cross the line of sight at right angles as you  
 look straight ahead. Back away from the pole  
 keeping the cords to the eye & allowing them to  
 slip through the hand. Do you see the pole is not  
 shortening, nor getting lower or smaller but the  
 angle made by the cords is constantly changing  
 becoming less & less sharper & sharper? If you  
 back away so far that the angle made by those  
 cords (which represents your line of sight or rays  
 of light) is one minute of one degree then the  
 object vanishes from sight. If you view the object  
 at its centre, then the lines marking its outward  
 dimensions must be equidistant from its centre  
 & so form the remaining angle at the same point.  
 But if the object be viewed at one side of the  
 center, these rays of light strike the eye at  
 different angles, and parts of the object will  
 remain visible longer than the rest.

Callon Illustration

Ship illustration

ships each same size & on same level.

The line "M" is the straight line from the eye to the  
 ship. Let it strike the ship 10ft from the  
 center edge. Then the line "F" goes to the

top of the flag 40ft above "M" & "R" to the waters edge 10ft below "M". Now it must be plain to any mind that as the ship recedes, the line "F" must lower into "E" & so form a sharper angle at the eye; "R" rises into "O". It is plain too that "O" being only 10ft below "M" must vanish into "M" before "E" which is 40ft above "M" will vanish into "M". In other words, the hull of the vessel must disappear before the masts & flag because the rays of light passing from the hull to the eye form the vanishing angle before those from the flag, since those from the hull are nearer to the line of sight. This explains why & how ships disappear at sea, but it does not explain why, when the ship has disappeared to the naked eye behind the hull of water a good telescope will often bring the whole vessel hull & all into view again. Let our scientists & opponents explain how this

is possible on a round surface. It has frequently been so seen. Don't dispute because you have not.

### PRACTICAL SURVEYING

In practical surveying & the construction of rlys & canals no allowance is made for the curvature of the earth. Serious difficulties would arise if curvature really existed & no allowance was made for it. The English Parliament in its session of 1862 made the following standing order on the subject.

"The section shall be drawn to the same horizontal scale as the plan, and to a vertical scale not less than 1 inch to every 100ft, & shall show the surface of the ground marked in the plan, the intended level of the proposed work, the height of every embankment, & the depth of every cutting, & a DATUM HORIZONTAL LINE, which shall be the same throughout the whole length of the work;

or any branch thereof respectively, & shall be referred to some fixed point " " near either of the termini. Parker & Son publishers London.

Mr. Hughes chief officer of the City of London said the following  
I have projected thousands of level miles of rly in S. America, & never heard of any allowance for curvature being made. On one occasion I surveyed over a 1000 miles of rly which was a perfect straight line all the way! It is well known that in the Argentine there are rly. 1000's of mls long without curve or gradient.

J. C. Knight in the "Cruise of the Falcon" Vol 2 p 102  
"From Tucuman to Cordova we were carried by Gt. rly. there are no curves on the way, the rails being carried in one perfectly straight line across the level plains."

Manchester Ship Canal Co. states

"It is customary in rly & canal constructions for all levels to be referred to a datum which is nominally horizontal, & is so shown on all sections. It is not the practice in laying out public works to make allowance for the curvature of the earth." Engineer Office Feb 19 1892  
Here practice disputes & wholly disproves theory

#### CIRCUMNAVIGATION

Prof. R. A. Gregory F.R.A.S. in "Elementary Physiography"  
"Circumnavigation in an easterly or westerly direction does not prove the earth to be globular." he continues. It has been pointed out that circumnavigation would be possible on a flat surface with the N. Magnetic pole at its centre.  
Circumnavigation on a flat surface, keeping everywhere equidistant from the center the N. M. Pole would bring the navigator back to his starting point according to the theory bearing imperfect

practice.

"Navigation in Theory & Practice" p 66 by Prof. Eves LL.D.

"Plain sailing is sailing a ship, or making the arithmetical calculations for doing so on the assumption that the earth is perfectly flat."

example rope attached to pole to reach to equator etc.

It is not claimed that all land is spread abroad in the circle surrounding the N. M. Pole.

### EARTH AT REST

We have stated that the earth is at rest. If we have made good our gravity question we have won that point.

Illustration

A stone cast iron cannon was firmly fixed in the sand as shown in the cut carefully plumbed in a true vertical position & fired into the air. The ball passed from the cannon mouth to "C" & fell back to within 8 in of cannon being in air only 30 secs. The experiment has been frequently repeated & on several occasions actually fell in the cannon mouth & never more than 2 ft away while the air time in the air was 28 secs. pp. 66 2et. Ast. by "Parallax"

If the earth is in motion from W. to E. at 17 mls per min. equatorial speed & the experiment was made on the equator & while the ball was in the air the earth should have travelled at least 8 mls. so it should have fallen that distance from the cannon. The result undoubtedly proves that the earth directly under the ball was absolutely stationary. Instead of passing in the direction of ~~A to C~~ & back to a few ins. from the

common the balls would have <sup>been</sup> <sup>driven</sup> from <sup>to</sup> <sup>down</sup> <sup>to</sup> <sup>the</sup> <sup>ground</sup> <sup>if</sup> <sup>it</sup> <sup>would</sup> <sup>have</sup> <sup>fallen</sup> <sup>on</sup> <sup>the</sup> <sup>mark</sup> <sup>line</sup> <sup>I</sup> <sup>fallen</sup> <sup>at</sup> <sup>V. J.</sup> <sup>In</sup>  
 addition we have learned that astronomers are wholly  
 unable to obtain any <sup>precise</sup> <sup>in</sup> <sup>the</sup> <sup>fixed</sup> <sup>stars</sup>  
 although the earth's orbit is said to be 186,000,000  
 of the atmosphere above the earth is a distance  
 of 50 to 200 miles in motion with the sun  
 motion on the earth all objects in the air would  
 move forward from west to east. But clouds  
 move generally about in all directions several  
 different rates of cloud <sup>our</sup> are known to move  
 in opposition to the motion of in various  
 directions of one of the same time. <sup>Ballroom</sup>  
 "The heavy rain of the earth, no little gift for  
 motion in every respect, could not be displaced  
 in the manner they propose, & moved in 3  
 different ways like the celestial bodies without

a hook to the known principles of physics, even  
 if they could not aside the <sup>whole</sup> <sup>contents</sup> <sup>of</sup> <sup>the</sup> <sup>scripture</sup>  
 In a house once prof. of Nat at Cambridge U.  
 "When we consider that the <sup>distance</sup> <sup>of</sup> <sup>the</sup> <sup>earth's</sup>  
 latitude & central position can account for a  
 appear the celestial phenomena an accuracy to  
 has even thinking as we can own, in addition to  
 which they have the evidence of their names and  
 Scripture, & facts in their <sup>own</sup> <sup>hands</sup>, which we have  
 not, it is not without a show of reason that  
 they maintain the <sup>superiority</sup> <sup>of</sup> <sup>their</sup> <sup>system</sup>.  
 It shows just as they may appear in  
 our own estimation & <sup>shows</sup> <sup>us</sup> <sup>the</sup> <sup>very</sup> <sup>nature</sup> <sup>of</sup> <sup>a</sup> <sup>refuting</sup>  
 the Newtonian hypothesis may seem to us to  
 account for all the celestial phenomena, yet we are  
 compelled to admit the <sup>antiquity</sup> <sup>truth</sup>, that if  
 our premises be admitted, & our facts challenged,  
 the whole range of our reasoning does not contain

one proof of its own accuracy."

## THE SUN

Since we dispute that there is any actual motion of the earth to cause day & night it devolves upon us to explain that phenomena.

Prof. J. Norman Lockyer

You have to take it as proved that the earth moves. Day & night are the best proofs that the earth <sup>does really</sup> spins. Without this spinning there would be no day & night, so that the regular succession of day & night is caused by this spinning. Hence the appearances connected with the rising & setting of the sun may be due either to the earth being at rest & the sun & stars travelling round it, or the earth itself turning round while the sun & stars are at rest.

If, therefore, "It may be due to either," why do not our scientists try to find out which of the two it really is & not merely assume the spinning

when there are so many proofs against it?

Spain & lantern example. Why this house is turning I know it is. Why I thought that was a dry town you visited today where did you get your booze?

Now we affirm that the common law of perspective previously explained, accounts for the disappearance of ships at sea, a bird, a balloon, an airship on mid air, a passing cloud, the rising culminating & setting (of the sun) or disappearing of the sun moon & stars as they move over & above the earth. The Sun is a small body about 30 mls in diameter & about 3000 mls above the earth. So its light is limited. It cannot penetrate to millions of miles distant. As it recedes from us to the westward, the angle of its rays finally reach the vanishing angle those from the lower part of the sun first just as those from the hull of a ship, so that the lower part of

the sun disappears first the rest gradually until it is all gone.

The sun moves over earth in two general circles halving answering the 2 hemispheres six mo. of the year he moves over the N. half & the other half a hemisphere during the remaining 6 mo. This accounts for 6 mo. day & 6 mo. night at the poles also the change of seasons. Suppose we take sun about 21st June when it has reached its greatest northern declination over the Tropic of Cancer. He makes one complete & perfect circle on the Tropic & then enlarges his circuit outwardly & southward toward the larger circle B which answers to the equator. Follow the course is marked by the arrows round the ever increasing circuit until each day moving about 18 mls further south until on 21st Sept he reaches equator at "B". Here he again makes a complete circle for one day & instead of continuing around the

N. centre or N. pole he crosses over into the southern circle towards "K" & on round the circle then begins a narrowing of the circuit towards the south centre & continues until the tropic of Capricorn is reached when the turn back outward & northward is made & he moves northward until the equator is again reached when he passes into the northern circuit. We also believe that while the sun is in the northern hemisphere we observe at the North P. could see it for a full six months at a time, a day so long. The S.P. would then have night. Why does the sun rise & set to us who live at a distance from the pole? Suppose we place a man at the centre of two circles one 10 ft the other 20 ft in diam. A ray "A" of "B" (on the circle "7") fig 15. Now with a 10 ft rod he could reach any point on the outer circle say to "B" "C" "D" & "E" on the circle "7". Now move him out to

"A" on the circle "C" & "F" with his rod he might be able to reach "C" & "E" & possibly beyond "B" on the circle "F" but he could not reach to "D" as he died from the centre at the N. pole. his rod is too short. So with sunlight. Its rays, like the rod are too short to reach from "B" to "D" but they may reach from "B" to "C" & "E" & across the circle through "A" to North P. on to the circle "C". So those living at "A" it is sunrise when the sun gets to "C" noon when it is at "B" sunset when it reaches "E" & night until he gets back to "C". So the further north the sun moves or in other words the nearer he moves towards the N. P. the longer will be day because he is getting where his rays will reach more nearly all over the circle like the man with the rod. So of the southern hemisphere. Therefore we believe that when the sun moves round his

circuit comes near enough for his limited light to reach us we have sunrise, daylight & day time until he passes so far away from us again that his rays will no longer reach us when we have sunset & darkened night. Connect this with the gravity question & you will readily concede the impossibility of the earth spinning to cause day & night, & yield to our claim that it is the sun which moves & not the earth. For if there is no gravity in operation, then the earth is at rest, it does not spin nor rotate on an orbit. The earth floats in or on the waters of the mighty deep partly submerged just as a log or iceberg floats in water. The inland seas are the hollows or depressions on the land portion filled with water, the earthen bed of the ocean connecting the continents in the same manner as the bed of the "M" connects Europe & Africa

"But the sun never sets" you object  
 This is only apparent, & in perfect harmony with  
 the Law of perspective & the action of Cookies  
 in the air here I insert fig 16 which illust.  
 my point. fig 16

Heavy line represents the earth's plane surface  
 or our horizon. place an observer at "A" in the  
 centre. The heavy line above represents the  
 course of the sun as he moves from E to W. in  
 one common level above the earth. Now if he  
 is eqm. distant all the time his plane is the same  
 as that of the earth's one common level parallel.  
 And all parallel lines meet when continued

to a great distance from the observer. Stand in the  
 center between the rails of a long line of straight  
 railroad. The rails seem to meet ahead of you.  
 On an incoming train the front appears higher & the  
 rear lower. That part of a long building  
 furthest from the camera when photographed  
 is shown lower in the picture though the  
 building is the same height throughout. This is  
 because the rays of light strike the <sup>lens of the</sup> camera at  
 different angles. So with the observer on look-  
 ing at the sun. The further away the lower  
 it appears to be.

"A" looks over the line (1) & sees the sun ~~at~~  
 low on the horizon although he is as high above  
 the earth at "E" as when he is at "G" or "C".  
 Now as the sun moves in a W direction to (2)  
 (3) & then "C" then (4) & (5) until finally  
 on line (6) or "G" he is in the zenith. Here his  
 lines strike the earth at right angles or 90 deg.

moving westward he gradually - the angle becomes  
 sharper until apparently getting lower & lower  
 until he is lost - vanishes & sets in the west.

Watch a bird or balloon it appears the same.  
 Clouds which at a few miles appear to be  
 resting on the earth are just as high above the  
 earth here as they are above your head. So  
 this is the way the sun rises & sets. The sun  
 seems to come down to the level of the eye  
 at rising & setting though it really does  
 not do so. So the earth seems to come  
 up level to the eye on an aeronaut,  
 though it really never does.

Aug 15

## DARKNESS IMPOSSIBLE ON A GLOBE

This is a condition commonly overlooked. Light from the sun radiates in all directions. Its rays are not concentrated along the lines  $\rightarrow$  to  $\leftarrow$

Fig 17

Since 1300,000 larger than earth that the light would sweep entirely round it so that it would amount no more to the sun than a pinhead on the rays of a 3 in. electric bulb. Would not the light after it passes the earth react, rebound, entirely envelope the side opposite the sun? The sun would be hidden from view to a person, just as it is when you sit in the shade of your house & read the news. You never need to go out into the direct rays to be able to read. Night would be no darker than the shade of our houses at noon day if the earth & sun are the sizes assumed by our astronomers.

Let us make figures to get a comparison.

5000 / 73,000,000 / 11625 inches roughly 1000 ft

Then a 1 in globe must be compared to a 9 ft sun globe placed 1000 ft apart. So let us cut in two 5 times as we did the size & we have our  $3\frac{2}{5}$ " sun globe to be placed 313" away from the  $\frac{1}{32}$ " earth globe. Place an 8000 mile earth 93,000,000 miles from an 866,000 mile sun & it cannot make the slightest shadow <sup>on</sup> 2160 mile moon 240,000 miles off to elude its face

## SUN'S DISTANCE

Contradictions in distance

Its actual distance was also cleverly guessed to be all the way from about 88 to 109  $\sim \sim \sim$  1869. At the time of the Transit of Venus over the face of the sun when observations were made in 73 stations. These results have been obtained by observing the sun's horizontal parallax i.e. the angle under which the semi diameter of the earth is seen from the sun.

Get "A" "B" characters "Zetetic" severely in his Glider for  
 for not being any more accurate than to say the distance  
 a 2000 or 3000 miles off.

He is told that at a distance of 122 ft from the  
 root of the tree a line drawn straight to its  
 top makes at a  $45^\circ$  angle what is the height?  
 He has learned before in his study of figures  
 that a  $45^\circ$  angle line is diagonal to  
 a perfect square & joins its opposite  
 corners.  $\therefore$  if B is a  $45^\circ$  angle & joins the  
 top of a tree to a point A 122 ft from  
 root it joins the two opposite corners of a

square: All sides of a square are equal.  $\therefore$  if  
 all sides are equal they are all 122 ft long.  
 $\therefore$  the tree is 122 ft high.  
 From 21st March to 21st Sept. each year the sun is  
 vertical straight up overhead at the equator.  
 Now at this time if a point can be found  
 either N or S of the equator where an observer  
 sees the sun at an angle of  $45^\circ$  the rule of  
 the half square will determine the distance.  
 We are to give the parallel which shows us  
 the sun from the earth & not the one which  
 shows us the earth from the sun.  $\therefore$  V  $\searrow$   
 . . . . . If I see an object from one  
 point & you see it from another distant  
 point it must be right where our two lines of  
 sight meet & cross. Now the sun is seen at  
 an angle of  $45^\circ$  from the perpendicular  
 from a point  $45^\circ$  N or S of the  
 equator. The distance from the equator to

$45^\circ$  parallel = the height of the sun above the earth. Geographers give us the distance of practically 70 mls to a degree.  $\rightarrow 6^\circ \text{C}$  accurate for all practical purposes so  $70 \times 45 = 3150$  mls height of sun. Distances N & S of equator. All perpendicular lines are parallel.

### SUN'S DIAMETER

I think we have proven clearly that the sun is near the earth about 3150 not 93 as  $0^\circ$  of postulate.  $\therefore$  it follows without argument it is a small body. Astronomers tell us it measures  $\frac{1}{2}$  of 1 degree in diameter.  $1 \text{ deg.} = \frac{1}{360}$  part of a circle. If the sun is 3150 mls distant as I have shown let that distance be the radius of a circle & the sun stand on the circumference of that circle. If 3150 is the radius 6300 is the diameter when multiplied  $3.1416$  gives  $19,792.08$  mls as the circumference

to a 1 deg = 37.97 call if you like 35 mls  $\frac{1}{2}$  of 1 deg =  $\frac{1}{2}$  of 35 =  $27\frac{1}{2}$  mls & not 866,000. A. tent.

Dr Robertson has written a book showing that the real size of the sun may be found in the area of vertical solar rays

fig 19

The line  $AC$  represents the plane surface of the earth. The lines  $O$  &  $D$  are the outer vertical rays of the sun & the central line the central rays. No ray of light outside  $OD$  could be vertical to the earth it must be obliquely to it. No observer outside  $O$  &  $D$  could see the sun directly overhead. A newspaper correspondent

wrote "On that Sunday we hauled to the north  
 of the sun. At noon on that day the ship  
 was in latitude 4 deg 30 min north the sun  
 in latitude 14 deg 28 min. Henceforth we  
 were to look at him with our backs to the south  
 instead of north. Here the ship at noon is  
 2 min north of the sun on the next day the  
 ship has hauled to the south of it. His diameter  
 cannot be 866,000 as Dr Robertson clearly shows but  
 is not over 36 miles. "Ancient geographers  
 found themselves considerably embarrassed in their  
 attempt to fix the northern tropic for though  
 they took every proper method namely to observe  
 the shortest place whose height had no  
 shadow on a certain day yet they found  
 that on the same day no shadow was cast  
 for the space of no less than 300 stadia."  
 The Roman stadium was 630.93 ft. 300  
 stadia would equal 189,279 ft or 35.84

mls. This does not agree with my calculation  
 on the circular plan but the discrepancy may be  
 due to an inaccuracy of measurement in either  
 or both cases.

"The Nautical Almanac" gives the apparent  
 diameter of the sun measured on the sphere of  
 the heavens March 22nd or Sept 23rd  
 as 32 min 2 seconds. 32 min of an arc  
 on the sphere of the heavens is equal to  
 32 geographical miles on the surface of  
 the earth, practically 36 miles.

### THE MOON

We believe that her size & distance from the earth  
 is practically the same as that of the sun &  
 that she moves in the same general course her  
 speed being less than that of the sun  
 consequently the sun overtakes & passes the moon  
 once every 29 days.  
 Rectangle pp. vi

## MOON LIGHT

We have been taught that she reflects the rays of the sun. A reflector throws off from its own surface whatever has been forced against it. The Ball & wall.

milk & water. Since the rays of sun possess heat moon rays, should also reflect heat. rays of her light be borrowed. "Road's Lectures on Chemistry" declare

"The light of the moon though concentrated by the most powerful burning glass is 'incapable of raising the temperature of the most delicate thermometer'" & The "Lancet" informs us "The Moon's rays when concentrated, actually reduce the temperature upon a thermometer more than 8 deg. Now since sun light is hot & moonlight is cold we know that sunlight is not reflected from the moon? or it would retain its heat.

Det. Cosmogony, p. 72

If you should hold a ball in any light, you may observe that  $\frac{1}{2}$  of its surface is illuminated. Some ray or rays of light will strike the ball exactly at the centre from top to bottom & at right angles to the axis of the ball. It falls just as far above the centre as below it. The illumination always stands exactly on a level with the illuminated body.  $\text{r b c v. e i x}$  If there is any change in the position of either body, there will be a corresponding change in the area of the illuminated surface. The light could not stand under the ball or globe & run clear round to the upper centre; it moves a  $\frac{1}{4}$  way round each way from its source.

Contd on page Aug 20

## ECLIPSES

We are taught by astronomers that an eclipse of the moon is caused by the earth intervening between it & the sun so that the earth casts a shadow on the moon.

When the moon gets on the side of the earth precisely opposite the sun the interpolation of the moon of the earth causes an eclipse of the moon.

Prof. Lamy in his *Lamy's planetarium* states that an eclipse can only occur at the time of a full moon this is in harmony with Sir R. Ball & indeed with all others.

Sir H. Holland "Reflections of Past Life"  
"On 20th Apr. 1837 the moon was eclipsed before the sun had set."

When the Sun is at *M* to be eclipsed by the earth's shadow the moon must be precisely opposite the Sun or at "*T*." If the sun is at "*K*" the moon must be at "*V*."

*E. Brench in 50 Scientific Facts*

"Not the last eclipse of the moon of Feb 28 1893 both luminaries were above the horizon when the eclipse occurred."

Lady E. A. M. B. Count at 7omorden lecture said she witnessed Apr 22 1892 when both were visible above the horizon.

Place a candle at a distance so that the shadow of the nail just reaches the other side of the plate. Remember there is no refraction of light unless the light passes from one density into the other. It has been shown that the image of an object is elevated & projected forward in case of refraction. Now pour some water in your tin pan & you will notice that the shadow of your nail will be shortened & lowered.

Instead of the light passing along line A to B, break it at the top & pass it down to S. Now when the sun is at M above the horizon his rays do not pass along line "C" to the earth & then turn up along the line "a" & allow the moon to be then obscured, but his rays would pass direct to the moon at "V" & in the case of refraction of the earth cast any shadow at all it would be shortened & depressed below the horizon down towards "T". Therefore the moon being

eclipsed when both it & the sun are above the horizon proves that it is not the shadow of an intervening earth which obscures the moon. So then supposed proof that the earth etc. fails just as regularly as have all other proffered proofs. It is said that more than 50 such eclipses are on record. The earth is reckoned to travel at 1100 miles per min. how long would it be passing the moon travelling herself at 180 miles per min. Not 4 mins. yet the eclipse of Feb 25 last (1893) lasted  $\frac{1}{2}$  hr so it could not be the earth intervening as the moon could be seen distinctly through the shadow & the moon was also seen among the stars.

The diam. of the moon is said to be 2160 miles the earth is said to move in its orbit round the sun at 1100 miles per min. Now if the moon stood still the distance would be covered in 4 mins. But the moon's motion is in the opposite direction to the earth so we are told her speed

being 180 mi per min. in time is a little less. The general appearance of an eclipse is strong evidence that it is not the moon & earth passing each other but some dark body moving from E to W in the same direction that the moon does but a little faster overtaking & passing the moon thus causing the different aspect of an eclipse.

"Art by mere calculation are able to forecast the position of any luminary at any given time for many years to come, by the same means they can foretell the rec. the commencement, duration precise aspect & the ending of all eclipses that will occur for a lifetime here, & more without limitation. Such being the case the theories upon which the calculations are based must be true or else the correctness of such calculations would be impossible." Gubern

But the movement of the sun moon & stars has nothing to do with the movement of the

earth.

"More than 2000 years ago the Chaldeans presented to Alexander the Great at Babylon tables of eclipses for 1993 years & the ancient Greeks made use of the cycle of 18 year 11 days the interval between two consecutive eclipses of the same dimensions. The last total eclipse of the sun occurred on Jan 22 1879 & the preceding one on June 11 1861. Now going back . . . for example from Jan 11 1861 through a period of 36 eclipses, or 657 years we find that a total eclipse occurred on Jan 11 1210; & continuing backwards by such cycles, we arrive precisely at the date of creation as given by Moses in Genesis."

The Mirrors

Also admission by Sir R. Ball on pp. 56

"Story of the Heavens".

So we can by mere calculation predict the occurrence

of the birthdays of all the members of our families  
 recorded we have a good record in our old family  
 bible. We can predict the occurrence of an  
 anniversary of any event of national or international  
 importance if we have a good historical record of  
 that event. This rule enabled ancient ast. to  
 predict eclipses at a time when all people  
 believed the earth a stationary plane the sun  
 moon & stars small bodies near the earth  
 moving above it. That is the rule that is  
 followed to-day. So that eclipses are not  
 foretold by computing the movements of the sun  
 moon & stars, but by reference to a carefully  
 kept record of eclipses.

### THE STARS

Star sizes & distances may be determined in the  
 same way as Sun or Moon. N. Pole Star never  
 changes his position in the heavens.  
 When a point is taken on the earth so that the

pole star angular distance is  $45^\circ$ , then the distance  
 on the earth's surface to that point directly under  
 the star will be the same as the vertical distance  
 up to the star as a  $45^\circ$  angle makes a diagonal  
 to a perfect square. This method of measurement  
 which is absolutely infallible in measuring the  
 heights of trees, stupes etc when used to measure  
 the height of the pole star locates it at about  
 3150 miles above the earth & not as Prof. Laming  
 says 186 trillion miles away.  
 The latest discovery in Astronomy by Prof Orlando Ferguson  
 place vertical poles in such a position as to line up  
 with some star in the east another line with a  
 star to the South, one in the west & one to the  
 N. of you. After a lapse of time say 2 hrs  
 go & observe. You will find that the star  
 on the E has moved southward, the one in  
 the South has moved to the westward, the star  
 in the west has moved northward & one in the

north has moved towards the east. "Any body  
 can try this for himself on any part of the earth  
 & in less than 3 hrs be convinced that all the  
 stars are travelling round the centre of both the  
 earth & the heavens which will absolutely prove  
 to anyone that the earth is stationary as the  
 bible says it is & that the sun moon & stars  
 travel around the centre of the earth. If you  
 think it is not true don't believe my theory  
 & if you find it to be true admit it & shame  
 the devil who have been deceiving the world so long.  
 Now if the stars in the heavens were still & the  
 earth spinning the star in the E would  
 rise up & pass directly over our heads, the star  
 in the W would sink down a traight to &  
 below the horizon while the one in the N &  
 the one in the S would each recede to the  
 westward. They do not behave so, but each  
 moves toward the right as you face it

of course they rise & set, just as the sun & the  
 moon but they move in a circuit nevertheless  
 So the above I append this testimony by Paul  
 Du Chaulles quoted from his "ravel of the  
 Midnight Sun".

"At the pole the observer seems to be in the  
 centre of a grand spirual movement of the  
 sun which further south takes place N of him  
 It (the sun) seems to travel round in a circle"  
 again he says "It's motion is very slow & for  
 quite awhile apparently follows the line of  
 the horizon.

It seems to me that the facts adduced in the  
 foregoing pages & the arguments based upon them  
 can do nought but convince any candid  
 minded reader unless you see to it that you  
 are not convinced. It must be the sure result  
 therefore I have now only to recule the bible  
 evidence of my conclusion.

So far in this discussion I have introduced philosophical, geographical & scientific evidence in support of our premises. This evidence has been abundantly sufficient to prove our contentions that the builder & maker of our earth is an intelligent person that understands as a fact that the earth is at rest & is a vast unbroken flat, horizontal, level plain, that the sun moon & stars are all small bodies seen to be in motion over & above the earth to give it light & heat. Now it remains to inquire whether my labour is in vain, whether the bible really teaches these doctrines which I have undertaken to support. If it does not so teach then so far as the bible is concerned this effort is useless. But if our deductions are correct it goes without saying that modern nominal science is woefully wrong to be

corrected; it would be a great benefit to man.

### THE BIBLE

If the bible does not say what it means on cosmogony I mean what it says I submit that we have no means of knowing what it does mean. We contend that the bible writers meant what they said & said what they meant. We believe too that they were not ignorant semi-savages who thought things are as they said they are. The God who made the universe knew & knows the origin order & arrangement of the material things of this universe & he by the agency of his holy spirit dictated to the various writers just what they should say. Let us examine what they said. In Gen. 1-11 the sequence declares that God was engaged in this work of creation during 6 24 hr. days. This is against the theory that the earth was self-evolved during a period of millions of years.

Ps 24 1-2      Ex 20 verse 4  
 Ps 136 ver 6      1 Pet 3 - 5  
 Isa 42 " 5  
 Isa 44 " 24

These text evidently mean to teach that the earth is an outstretched plane floating on & in the waters of the mighty deep just as an iceberg or log of wood partly submerged.

Ps 138 7, 8, 9      Isa 13-10

Ec 37 708      Joel 3-18

Gen 1-17 when they were pleased

Ps 14 1-4      Joshua 10-13

Matt 24-29      Rev 6-13

Ps 19 1-6      Ecc 1-5

Judges 5-31      John 16 12-14

Is 38 8.      Ps 93-1

Ps 104-5      Malachi 6-2

Ps 24-2

## CONCLUSION

He who bases his rejection of the Bible with its offer of eternal salvation on modern science has chosen a very poor foundation.

He has exchanged a solid substance for a myth wealth for poverty. Believing that infidels are reasonable beings whose judgements must be convinced I have appealed to their reason. I believe them honest & sincere & not willing to jeopardize their eternal interests rashly, but feel that they are in darkness & uncertainty. I make this effort on their behalf. They surely want all the benefits due to man & would not willingly let us readily despise them. For one to despise his own best good would be the gravest of folly. Would good could confidence do to me should I adopt it. Do they think they are conferring some benefit on me by offering it? Are they substituting

something better for my belief of religion?  
 Is my religion a good thing, something  
 detrimental to me, harmful in this life,  
 injurious to my prospects for a better hereafter?  
 What does it offer me instead of my faith?  
 No! it takes away everything & offers me nothing.  
 It is of no possible benefit here. It does not  
 relieve me of one unpleasant condition or  
 experience in the world. The inf. possesses  
 no more than I possess. God says  
 I can  
 practice & trust myself as in them as truly as  
 I can. I am  
 Christian you God  
 eat as much  
 humanity skeptic

No war  
 himself  
 my Christianity  
 undertaken by eternal  
 God himself. I offer me not  
 one single thing more here  
 it robs me of my peace, joy, contentment,  
 suppresses here & my prospects for a better brighter  
 hereafter. I shall  
 rear up dark despair to stare me constantly in  
 the face.  
 I shall still stand of the side of the Roman fool  
 who said he "preferred to stay on the safe side  
 even on a dead river, or like president Garfield  
 who when he lay stretched down by the foul  
 assassins bullet was told by his physicians that  
 he only had one chance in a 1000 & he  
 replied "I take that one chance!"

Grant that Christianity is a deception that the  
 deriving of man is as the infidel teacher. Still  
 we have the joy of hope & anticipation to cheer &  
 comfort us here, which skeptics have not & we fear  
 just as well hereafter. Sin & death does us no  
 damage & does us no good. But should we let  
 the Bible prove to be right or be wrong? which takes  
 the greater risk?

## 100 Proofs Contd

It is well known that the law regulating the apparent decrease in the size of objects as we leave them in the distance or as they leave us is very different with luminous bodies from what it is in the case of those which are non luminous. Sail past the light of a small lamp in a row boat on a dark night & it will seem to be no smaller when a mile off than when close to it. Proctor speaking of the sun "his apparent size does not change" - <sup>but</sup> <sup>if</sup> you <sup>are</sup> near & then he forgets the fact. Mr P tells us subsequently that if the traveller goes so far south that the N star appears to be on the horizon "the sun should  $\therefore$  look much larger - of the earth <sup>from a pole</sup>  $\therefore$  he argues that "the path cannot <sup>be</sup> <sup>followed</sup> <sup>by</sup> the straight course but a curved one. Now since it is nothing but common scientific trickery to bring

forward as an objection to stand in the way of a plane earth, the non-appearance of a thing which has never been known to appear at all, it follows that unless that which appeared to be trickery were an accident it was the only course open to the objector to trick (Mr P in a letter to the English mechanic for Oct 20 1871) boasts of having turned a recent convert to the Zetetic philosophy by telling him that his arguments were all very good <sup>but</sup> that "it seems as though the sun <sup>clearly the world</sup> ought to look 9 times larger in summer & Mr P concludes thus "he saw indeed that on his faith in Ptolemy he had 'written himself down an an' Well trickery or no trickery on the part of the objector the objection is a counterfeiter - a fraud - no valid objection at all & it follows that the system which does not judge itself of these things is a rotten system & the system which it advocates with Mr P

at its head would crush if they could find a  
 weapon the 2<sup>d</sup> Phil. This is etc.

90 In water level or is it not was a question  
 asked of an astronomer "Practically yes  
 theoretically no" was the reply. Now when  
 theory does not harmonize with practice the  
 best thing to do is to drop the theory. To  
 drop the theory which supposes a curved  
 surface to standing water is to acknowledge  
 the facts which form a base of 2<sup>d</sup> Phil.  
 And since this will have to be done sooner  
 or later this is etc.

91 "By actual observation" says Schoedler  
 in his "book of <sup>capitals</sup> nature" we know that the  
 other heavenly bodies are spherical hence  
 we unhesitatingly assert that the earth  
 is so also. This is a fair example of  
 Art. reasoning. When a thing is classed  
 among other things the likeness between

them must first be proven. It does not take a  
 Schoedler to tell us the heavenly bodies are  
 spherical "but the greatest art of the age"  
 will not now dare to tell us that THE EARTH  
 is I attempt to prove it. Now since no like-  
 ness has ever been proven to exist between  
 the earth & the heavenly bodies the classification  
 of the earth with the heavenly bodies is  
 premature unscientific false this is etc.

92 "There is no inconsistency in supposing that  
 the earth does not move round the sun"  
 says the Art. royal of E. Certainly not  
 when theoretical art. is all supposition  
 together. This inconsistency is in teaching  
 we would that the thing supposed is a fact  
 & some "probability" & "approximacy" then the  
 motion of the earth is only supposition; since  
 indeed it is necessary to suppose it at all  
 it is plain that it is a fiction & not a

fact of some "mobility" & "sphericity" stand or fall together we have before us etc.

93 We have seen that art. to give us a level surface on which to carve have cut off  $\frac{1}{2}$  of a globe in a certain picture in their books. Now having done this  $\frac{1}{2}$  the substance of their spherical theory must given up since the theory must stand or fall in its entirety it has fallen when  $\frac{1}{2}$  is gone this is etc.

94 In "Cornell's Geography" there is an illustrated proof of the form of the EARTH. A curved line on which is represented a ship in 4 positions as she sails away from the observer in an arc of  $72^\circ$  or  $\frac{1}{5}$  of the supposed circumference of the "globe" - about 5000 miles. Ten such ships as those which are given in the picture would reach the full length of the "arc" making 500 miles as

the length of the ship. The man in the picture who is watching the ship as she sails away is about 200 mls high & the tower from which he takes an elevated view, at least 500 miles high. These are the proportions then of men, towers & ships which are necessary in order to see a ship in her different positions; as she "rounds the curve" of the "great hill of water" over which she is supposed to be sailing for it must be remembered that this supposed proof depends upon lines & angles of vision which, if enlarged, would still retain their characteristics. Now since ships are not built 500 mls long with masts in prop. & men not quite 200 mls high it is not what it is said to be a proof of sphericity but either an ignorant fancy or cruel piece of deception. In short it is etc.

97 Mr Bond the English Ast. says "The simplicity with which the seasons are explained by the revolution of the earth in her orbit & the obliquity of the ecliptic, may certainly be <sup>advanced</sup> as a strong presumptive proof of the correctness of the Newtonian theory; for on no other rational suppositions with respect to the relations of the Earth & Sun can these & other as well-known phenomena be accounted for." But as true philosophy has no "suppositions" at all & has nothing to do with "suppositions" of the phenomena spoken of are thoroughly explained by facts the "presumptive proof" falls to the ground covered with the ridicule it so richly deserves; & out of the quest of Mr Bond's "rational suppositions" we may see standing before us a proof etc.

98 Mr Bond speaks of an ast. watching a star as it is carried across the telescope by the diurnal revolution of the earth. Now this is nothing but downright absurdity. No motion of the earth could possibly carry a star across a telescope or any thing else. If the star is carried across any thing at all it is the star that moves not the thing across which it is carried. Besides the idea that the Earth if it were a globe could possibly move in an orbit of nearly 600,000,000 miles with such exactitude that the cross hairs in a telescope fixed ~~on a telescope~~ <sup>on its</sup> surface would appear to glide gently over a star millions of do. of miles away is monstrous whereas with a fixed telescope it matters not the distance of a star though we suppose them to be as far off as the Ast. supposes them to be for as Mr Proctor

himself says "The further they are away the less will they seem to shift" Why in the name of common sense should observers have to fix their telescopes on solid stone bases so that they should not move a hair's breadth; of the earth on which they fix them move at the rate of 19 miles per second: indeed to believe <sup>that</sup> in Mr "P" man of 6,000,000,000,000 tons is "rolling", reeling, flying darting on through space for ever with a velocity compared with which a shot from a cannon is a very slow crawl & with such unerring accuracy that a telescope fixed on granite pillars on a oblong way will not ~~allow~~ shudder a lynx eyed ast. to detect a variation in its onward course motion of 1000 part of a hairs breadth is to conceive a miracle compared with which all the miracles on record put together would sink into utter insignificance. Capt R. S. Harman the late compiler of "Zadkiels Almanac" says "We declare

that this motion is all Cook & that the arguments which uphold it are when examined with an eye that seeks for truth only, mere nonsense, & childish absurdity." Since then these absurd theories are of no use to men in their senses, & since there is no necessity for anything of the kind in Zetetic Philosophy it is a strong presumptive proof "as Mr Hind would say that The Zet. Phil. is true & ∴ a proof etc.

99 Mr Hind speaks of 2 great mathematicians differing only 5 yds in their estimate of the earths diameter. Why. Sir John Herschel in his celebrated work cuts off 480 miles of the same thing to get "round numbers!" This is like plucking a hair on one side of the head & shaving shaving all the hair off on the other. If Science can there be any truth in science like this? All the exactitude in Ast. is in practical astronomy - not

Theoretical. Centuries of observation have made  
 Practical Art a noble art & science; based as  
 we have a 1000 times proved it to be - on a  
 diseased earth; & we denounce the pretended  
 exactitude on the one side & the reckless  
 indifference to figures on the other as the basest  
 trash, & take from it a proof that the  
 "science" which tolerates it is a false instead  
 of being an "exact science" & we have etc.
